

AR-15/M16 HANDGUARD ALIGNMENT TOOL - BROWNELLS HANDGUARD ALIGNMENT TOOL

[Gunsmith Tools](#) > [Rifle Tools](#) > [Handguard Tools](#)

Maintains Precise Handguard Alignment While Tightening The Locking Ring

Eyeballing a railed, free-float handguard for perfect alignment with your flattop receiver is only half the battle. Keeping it from going cockeyed as you tighten the locking ring is another story. Talk about frustrating! Avoid the hassle with this handy jig that aligns the top handguard rail with the receiver rail and keeps it there. Just slide the jig on the rails, secure its setscrews, and tighten the locking ring you're done! With the time it saves, this tool will pay for itself the first few times you use it. A must for maintaining handguard alignment to ensure night vision devices, vertical grips, flip-up front sights, and other add-on accessories are also properly aligned. Precision machined from high-quality 6061 billet aluminum, then hardcoat anodized for extra strength and years of wear resistance. Designed for use with railed, free-float tubes that have a locking ring.

Safety Instruction Guide for AR15/M16 Handguard Alignment Tool

Introduction

Thank you for choosing the AR15/M16 Handguard Alignment Tool by Brownells. This tool is designed to simplify the alignment of your handguard with your flattop receiver, ensuring proper installation of accessories such as night vision devices and vertical grips. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always read and understand the product instructions before use.
- Use the tool only for its intended purpose.
- Keep the tool out of reach of children and vulnerable individuals.
- Inspect the tool for any damage before each use. Do not use if damaged.
- Store the tool in a dry place when not in use to prevent corrosion.
- If you experience any issues while using the tool, stop and consult a professional.

Specific Safety Precautions for Use

- Ensure that the firearm is unloaded and the safety is engaged before using the alignment tool.
- Avoid placing fingers or hands near the locking ring when tightening to prevent pinching or injury.
- Use protective eyewear when working with firearms and tools to shield against debris.
- Do not force the tool into place; it should fit snugly without excessive pressure.
- Be aware of your surroundings and ensure that no one is in close proximity while using the tool.

Instructions for Installation and Usage

1. Preparation

- Ensure the firearm is unloaded and placed on a stable surface.
- Gather all necessary tools, including the handguard alignment tool.

2. Aligning the Handguard

- Slide the alignment jig onto the rails of the handguard and receiver.
- Secure the jig by tightening the setscrews until it is firmly in place.
- Confirm that the top rail of the handguard is aligned with the receiver rail.

3. Tightening the Locking Ring

- Once the alignment jig is secured, carefully tighten the locking ring to hold the handguard in place.
- Ensure that the handguard remains aligned during this process.

4. Final Checks

- After tightening, doublecheck the alignment of the handguard.
- Remove the alignment jig and inspect the installation to ensure everything is secure.

Disposal Instructions

- Dispose of the tool responsibly at a recycling facility that accepts aluminum products.

- Do not discard the tool in regular household waste to minimize environmental impact.

Contact Information for Further Support

For any inquiries regarding safety or product issues, please consult the product packaging or your point of purchase for appropriate contact information.

Thank you for your commitment to safe practices while using the AR15/M16 Handguard Alignment Tool. Your safety is our priority.
