

SHOTGUN SIGHT KIT "A" - SHOTGUN SIGHT BRASS REFILL SIGHT #3 SINGLE

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

SHOTGUN SIGHT KIT "A" Safety Instruction Guide

Introduction

Thank you for choosing the Brownells Shotgun Sight Kit "A." This guide provides essential safety instructions to ensure the safe use of the product. Please read this guide carefully before using the shotgun sight kit.

General Safety Guidelines

To ensure your safety and the safety of others, please adhere to the following guidelines:

- Always inspect the shotgun sight kit for any damage or defects before use.
- Ensure that the shotgun is unloaded and pointed in a safe direction when installing or adjusting sights.
- Keep the kit and its components out of reach of children and unauthorized users.
- Use the shotgun sight kit only for its intended purpose.
- Avoid using the product in wet or damp conditions to prevent corrosion.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

When using the Brownells Shotgun Sight Kit "A," please take the following precautions:

- Ensure that you are familiar with the specific shotgun model you are working on and its sight specifications.
- Use appropriate tools when installing or adjusting sights to avoid injury.
- Always wear safety glasses to protect your eyes from debris during installation.
- Do not force any components into place; if they do not fit easily, check for compatibility.
- Be cautious of sharp edges on the sight components during handling.

Instructions for Installation and Usage

Follow these steps for the proper installation and usage of the shotgun sights:

1. Preparation:

- Gather all necessary tools, including a drill and tap set, if required for installation.
- Ensure you have the correct size shank and bead for your shotgun model.

2. Installation:

- Confirm that the shotgun is unloaded and pointed in a safe direction.
- Remove the existing sight if applicable.
- If necessary, drill a new hole using the appropriate drill bit for the 648 or 356 shank, depending on your choice.
- Tap the hole to create threads for the shank.
- Select the desired bead size (0.067, 0.130, or 0.175) and color (Gold or White).
- Carefully screw the shank into the threaded hole until secure. Do not overtighten.
- Align the sight properly for optimal accuracy.

3. Usage:

- After installation, check the alignment of the sight before using the shotgun.
- Practice safe handling and shooting techniques at all times.

Disposal Instructions

To dispose of the Brownells Shotgun Sight Kit “A” and any unused components:

- Follow local regulations for the disposal of metal and plastic materials.
- Do not dispose of the product in household waste.
- Consider recycling options for metal and plastic components where available.

Contact Information for Further Support

For any inquiries regarding the safety of the Brownells Shotgun Sight Kit “A,” please reach out to the designated EU contact point or your local authorities.

By adhering to these safety guidelines and instructions, you can ensure a safe and effective experience with your Brownells Shotgun Sight Kit “A.” Thank you for your attention to safety.
