

SHOTGUN SIGHT KIT "A" - SHOTGUN SIGHT ALUMINUM REFILL SIGHT #5 SINGLE

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

Safety Instruction Guide for Brownells Shotgun Sight Kit "A"

Introduction

Thank you for choosing the Brownells Shotgun Sight Kit "A." This comprehensive kit is designed for professional gunsmiths and sporting goods enthusiasts. It includes a variety of high-quality replacement shotgun sights. To ensure safe and effective use of this product, please read this safety instruction guide carefully.

General Safety Guidelines

- Always handle the shotgun sights with care to avoid injury.
- Ensure that the shotgun is unloaded and pointed in a safe direction when installing or adjusting sights.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the sights for wear and damage before use.
- Follow all local laws and regulations regarding firearms and their accessories.

Specific Safety Precautions for Use

• Installation Safety:

- Use appropriate tools when installing or replacing sights to avoid damage or injury.
- Ensure that your workspace is clean and free from distractions.

• Usage Safety:

- Always wear safety glasses when working with firearms and accessories.
- Do not attempt to modify the sights or use them in ways not intended by the manufacturer.

• Storage Safety:

- Store the sights in a cool, dry place away from direct sunlight.
- Keep the sights in their original packaging or a secure case to prevent damage.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the shotgun is completely unloaded.
- Gather necessary tools: screwdriver, drill, tap, and safety glasses.

2. Choosing the Right Sight:

- Select the appropriate shank size (356 or 648) and bead size (.067, .130, or .175) based on your shotgun's specifications.
- Choose the desired bead color (Gold or White).

3. Installation:

- If necessary, drill a new hole using the appropriate drill bit for the selected shank size.
- Tap the hole to create threads for the sight.
- Align the sight with the drilled hole and screw it in until secure. Do not overtighten.

4. Adjusting the Sight:

- Once installed, check the alignment by aiming the shotgun at a target.
- Make any necessary adjustments to ensure proper sighting.

5. PostInstallation Check:

- Inspect the installation to ensure the sight is secure and properly aligned.
- Test the shotgun in a safe environment to ensure the sight functions as intended.

Disposal Instructions

- Dispose of any damaged or worn sights responsibly.
- Follow local regulations for the disposal of metal and plastic materials.
- If unsure about disposal methods, consult with local waste management authorities.

Contact Information for Further Support

For any inquiries or concerns regarding the Brownells Shotgun Sight Kit "A," please refer to the packaging for contact details of the manufacturer.

By following these guidelines, you can ensure the safe and effective use of your Brownells Shotgun Sight Kit "A." Thank you for your attention to safety. Enjoy your shooting experience!
