

# SHOTGUN SIGHT KIT "A" - BROWNELLS SHOTGUN SIGHT ALUMINUM REFILL SIGHT #6 SINGLE

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

## Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

# Brownells Shotgun Sight Kit “A” Safety Instruction Guide

## Introduction

Thank you for choosing the Brownells Shotgun Sight Kit “A.” This guide provides essential safety information and instructions to ensure the safe use of your product. It is crucial to follow these guidelines to minimize risks and maximize your satisfaction with the product.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose as a shotgun sight replacement.
- Always inspect the sights for any visible damage before installation. Do not use damaged sights.
- Keep the product out of reach of children and vulnerable individuals to prevent accidental injuries.
- Be aware of your surroundings while using the shotgun and ensure that no one is within the line of fire.
- Report any unsafe product experiences or accidents to the appropriate authorities.
- Stay updated on any product recalls or safety alerts via the EU’s Safety Gate platform.

## Specific Safety Precautions for Use

- Handle all components with care to avoid injury.
- Use appropriate tools when installing the sights to avoid damage to the product or the firearm.
- Ensure that the firearm is unloaded before beginning any installation or adjustment of the sights.
- Follow all local laws and regulations regarding firearm safety and usage.
- If you are not familiar with firearm maintenance or sight installation, seek assistance from a qualified gunsmith.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that you have the necessary tools, including a suitable drill and tap set for the shank sizes (356 and 648).
- Choose the appropriate bead size (.067, .130, or .175) and color (Gold or White) based on your preference.

### 2. Installation:

- Unload the firearm and ensure it is pointed in a safe direction.
- If necessary, redrill and tap the sight hole using the 648 size if the original hole is not suitable.
- Clean the area around the sight hole to ensure a proper fit.
- Screw the chosen sight into the threaded hole, ensuring it is secure but not overly tight to avoid stripping the threads.

### 3. Usage:

- Once installed, test the sights for stability and alignment.
- Make any necessary adjustments to ensure proper sighting for accuracy.
- Regularly check the sights for any signs of loosening or damage during use.

## **Disposal Instructions**

- Dispose of any damaged or unused sights in accordance with local regulations.
- Do not dispose of the product in household waste. Instead, consider recycling options for metal components where available.
