

SHOTGUN SIGHT KIT "A" - SHOTGUN SIGHT ALUMINUM REFILL SIGHT #7 SINGLE

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

Safety Instruction Guide for SHOTGUN SIGHT KIT "A"

Introduction

Thank you for choosing the Brownells Shotgun Sight Kit "A." This guide provides essential safety instructions and guidelines to ensure the safe use and handling of your shotgun sight kit. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as outlined in this guide.
- Keep the kit out of reach of children and vulnerable individuals to prevent accidental injury.
- Inspect the product regularly for any signs of damage or wear. If any damage is found, discontinue use immediately.
- Follow all local laws and regulations regarding firearm accessories and modifications.
- Report any unsafe conditions or accidents related to the product to the appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including eye protection, when handling firearms and accessories.
- Ensure that the firearm is unloaded before installing or replacing sights.
- Avoid using the shotgun sight kit in wet or damp conditions to prevent corrosion of metal components.
- Be cautious when redrilling or tapping new holes in the firearm. Use proper tools and techniques to avoid damaging the firearm.
- Do not attempt to modify or alter the sights beyond the manufacturer's specifications.

Instructions for Installation and Usage

1. Selecting the Right Sight:

- Choose the appropriate shank size (356 or 648) based on your firearm's threaded sight holes.
- Select the desired bead size (.067, .130, or .175) and color (Gold or White) for your application.

2. Installation Steps:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Remove the old sight if applicable, using appropriate tools.
- Clean the sight hole to ensure a proper fit for the new sight.
- Carefully thread the new sight into the hole, ensuring it is aligned correctly. Do not overtighten, as this may damage the sight or the firearm.
- If redrilling is necessary, use a drill and tap that match the 648 size specification. Follow standard procedures for drilling and tapping to create a new hole safely.

3. Usage Guidelines:

- Regularly check the tightness of the sight during use, especially after extended shooting sessions.
- Clean the sights periodically to maintain visibility and performance.

Disposal Instructions

- Dispose of any damaged or worn sights in accordance with local regulations.
- Recycle metal components where possible. Check with local recycling facilities for proper disposal.

methods.

Contact Information for Further Support

For any questions or concerns regarding the use of the Brownells Shotgun Sight Kit "A," please refer to the manufacturer's contact information provided in the product packaging or on the official website.

Thank you for prioritizing safety in your use of the Brownells Shotgun Sight Kit "A." By following these guidelines, you can ensure a safe and effective experience.
