

SHOTGUN SIGHT KIT "A" - SHOTGUN SIGHT ALUMINUM REFILL SIGHT #8 SINGLE

[Shotgun Parts](#) > [Sights](#) > [Sight Parts](#) > [Sight Refills](#)

Replacement Shotgun Beads

Brownells Shotgun Sight Kit "A" is truly one of the most unusual bargains ever offered a Sporting Goods Store or Professional Gunsmith in a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those you have found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop. The two shank sizes are 3-56 and 6-48. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole. Bead sizes are .067, .130 and .175, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in either Gold color - machined from finest brass; or White color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do. Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested. Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today! Refill Sights for Kit "A" - Refills for the Shotgun Sight Kit "A" are single or 10-pak of sights of one number.

Safety Instruction Guide for SHOTGUN SIGHT KIT "A"

Introduction

Thank you for choosing the Brownells Shotgun Sight Kit "A". This guide provides important safety information and instructions to ensure the proper use and maintenance of your shotgun sight kit. Please read this manual carefully before using the product.

General Safety Guidelines

- Always handle firearms and related accessories with care and responsibility.
- Ensure that the shotgun sights are installed correctly to avoid accidents or injuries.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the sights for wear or damage before use.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- Do not use the shotgun sight kit if any components are damaged or missing.
- Ensure that the shotgun is unloaded before installing or adjusting the sights.
- Use appropriate tools and techniques when installing the sights to avoid injury.
- Avoid using excessive force when tightening or adjusting the sights, as this may damage the product or firearm.
- Be aware of your surroundings and ensure that you are in a safe environment when using firearms.

Instructions for Installation and Usage

1. Preparation

- Ensure that your shotgun is unloaded and pointed in a safe direction.
- Gather all necessary tools, including a screwdriver and any other required installation tools.

2. Selecting the Sight

- Choose the appropriate shank size (356 or 648) based on your shotgun's specifications.
- Select the desired bead size (.067, .130, or .175) and color (Gold or White).

3. Installation

- If necessary, drill and tap a new hole using a 648 screw size if the original hole is not available.
- Thread the chosen sight onto the shank until it is securely in place.
- Position the sight on the barrel where you want it to be installed.
- Tighten the sight carefully, ensuring it is secure but not overtightened.

4. Usage

- Once installed, check the alignment of the sight with the shotgun's barrel.
- Practice shooting in a safe environment to familiarize yourself with the new sight.
- Regularly check the sight's position and tightness during use.

Disposal Instructions

- Dispose of any damaged or worn sights in accordance with local regulations.
- Do not dispose of the product in regular household waste. Contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the Brownells Shotgun Sight Kit "A", please reach out to the manufacturer or your point of purchase for assistance.

By following these safety instructions, you can ensure a safe and effective experience with your shotgun sight kit. Thank you for prioritizing safety and responsible firearm use.
