

1911 STOCK SCREWS - 1911 STANDARD STOCK SCREWS BLUED 48 PACK

[Handgun Parts](#) > [Frame Parts](#) > [Frame Hardware](#) > [Frame Screws](#)

Made to Original Factory Specs For Easy Replacement

The 1911 Government model auto is about as rugged as a mountain mule, but when you take the grips off to polish and reblue the critter or put on another set of grips, chances are that at least one of the stock screws will need replacing. Standard Stock Screws - Nicely made and finished, these special-sized, blued screws are packed in sets of 4 Screws. Stainless Steel (S/S) Stock Screws - Look "right" on stainless steel and nickel-plated guns.

Safety Instruction Guide for 1911 Stock Screws

Introduction

Thank you for purchasing the 1911 Stock Screws. These screws are designed for use with 1911 Government, Commander, and Officers models. This guide provides essential safety instructions to ensure safe usage and installation of the product in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always inspect the screws for any signs of damage or wear before use.
- Ensure that the product is suitable for your specific firearm model.
- Keep the screws and all related tools out of reach of children and vulnerable individuals.
- Do not use the screws if they appear to be defective or do not fit properly.
- Report any unsafe products or incidents to the relevant authorities.

Specific Safety Precautions for Use

- Use appropriate tools when installing or removing the screws to avoid injury.
- Ensure that the firearm is unloaded and pointed in a safe direction before beginning installation or maintenance.
- Wear safety goggles to protect your eyes from potential debris during installation.
- Do not overtighten the screws, as this may cause damage to the firearm or the screws themselves.
- If you are unsure about the installation process, seek assistance from a qualified gunsmith.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the firearm is completely unloaded.
- Gather all necessary tools, including a screwdriver suitable for the screws.

2. Removing Old Screws:

- Carefully remove the existing grips from the firearm.
- Use the screwdriver to gently unscrew the old stock screws. Take care not to strip the screw heads.

3. Installing New Screws:

- Align the new stock screws with the holes in the grip and the frame.
- Handtighten the screws initially to ensure proper alignment.
- Use the screwdriver to tighten the screws securely, but avoid overtightening.

4. Reattaching Grips:

- Once the new screws are installed, reattach the grips to the firearm.
- Ensure that the grips are fitted properly and securely.

5. Final Check:

- Inspect the installation to ensure that everything is secure.
- Perform a function check on the firearm to ensure it operates correctly.

Disposal Instructions

- Dispose of any old or damaged screws in accordance with local regulations.
- Do not dispose of screws in a manner that may pose a risk to the environment or public safety.

Contact Information for Further Support

For any safety inquiries or concerns regarding the 1911 Stock Screws, please consult with a qualified professional or refer to the manufacturer's guidelines.

Thank you for your attention to these safety instructions. Your safety and the safety of others is paramount when handling firearms and related accessories.
