

# 1911 STOCK SCREWS - 1911 STANDARD STOCK SCREWS STAINLESS 4 PACK

[Handgun Parts](#) > [Frame Parts](#) > [Frame Hardware](#) > [Frame Screws](#)

## Made to Original Factory Specs For Easy Replacement

The 1911 Government model auto is about as rugged as a mountain mule, but when you take the grips off to polish and reblue the critter or put on another set of grips, chances are that at least one of the stock screws will need replacing. Standard Stock Screws - Nicely made and finished, these specialized, blued screws are packed in sets of 4 Screws. Stainless Steel (S/S) Stock Screws - Look "right" on stainless steel and nickel-plated guns.

# Safety Instruction Guide for 1911 Stock Screws

## Introduction

Thank you for choosing the 1911 Stock Screws. Designed for use with the 1911 Government model, Commander, and Officers firearms, these screws are a vital component for ensuring the secure attachment of grips. This guide provides important safety information, installation instructions, and disposal guidelines to ensure safe and effective use.

## General Safety Guidelines

- Always handle firearms with care and ensure they are unloaded before performing any maintenance or modifications.
- Ensure that you are in a safe environment when working with your firearm.
- Keep the screws and all firearm components out of reach of children and unauthorized individuals.
- Regularly check for recalls or safety alerts regarding your product on the EU Safety Gate platform.
- If you notice any damage to the screws or the firearm, cease use immediately and consult a qualified gunsmith.

## Specific Safety Precautions for Use

- Verify that the screws are compatible with your specific model of firearm (Government, Commander, or Officers).
- Do not overtighten the screws as this may strip the threads or damage the stock.
- Inspect screws for wear or damage before each use. Replace any screws that show signs of corrosion, bending, or stripping.
- Use appropriate tools to install or remove screws to avoid injury or damage to the firearm.
- If you are not familiar with firearm maintenance, seek assistance from a qualified professional.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure the firearm is unloaded and in a safe position.
- Gather necessary tools, including a screwdriver that fits the screw head.

### 2. Removal of Old Screws:

- Carefully unscrew the old stock screws using the appropriate screwdriver.
- Keep the old screws in a safe place until you confirm that the new screws are properly installed.

### 3. Installation of New Screws:

- Align the new stock screw with the hole in the grip.
- Insert the screw and turn it gently until it is handtight.
- Use the screwdriver to tighten the screw securely, but do not overtighten.

### 4. Final Checks:

- After installation, check that the grips are secure and that there is no movement.
- Test the firearm's functionality without ammunition to ensure everything is properly secured.

## Disposal Instructions

- Dispose of any damaged or unusable screws in accordance with local regulations.
- Do not dispose of screws in regular household waste. Instead, use a designated metal recycling facility if available.
- Ensure that any packaging materials are recycled or disposed of responsibly.

## Contact Information for Further Support

For any safety inquiries or additional support regarding the 1911 Stock Screws, please consult your local firearms dealer or manufacturer's website. It is essential to have access to reliable information and assistance when handling firearm components.

By following these guidelines, you can ensure a safe and effective experience with your 1911 Stock Screws. Always prioritize safety and seek professional assistance when needed.
