## Easier, Faster Reloads; Improves The Grip; No Gunsmithing Required

Drops right onto 1911 Auto frames without gunsmithing, and the separate magazine well can be removed without disassembling the pistol. Enlarged magwell greatly increases frame opening for faster and easier magazine changes. Flat housing increases grip surface area to help keep the pistol from riding up during rapid fire. Available in blue or stainless steel with 25 lpi machined checkering that helps keep the pistol centered in your grip. Also available with the exclusive Chainlink and Chainlink II designs. Both machined-in patterns provide a very secure, non-slip gripping surface, without the "sharpness" of conventional checkering that can sometimes abrade your hand or grab at your clothing during a concealed carry draw. Also available for the Officer's model in blued or stainless steel with 25lpi checkering.
