

FLASH HOLE DEBURRING TOOLS - RCBS FLASH HOLE DEBURRING TOOLS REPLACEMENT ROD & CUTTER

[Reloading](#) > [Case Preparation](#) > [Flash Hole Deburring Tools](#)

Burrs left on the inside of the flash hole during manufacturing can cause erratic ignition. This handy tool automatically locates the hole and quickly removes the burr. A self-centering pilot collar with an adjustable stop allows quick alignment and prevents the removal of too much brass.

Safety Instruction Guide for RCBS Flash Hole Deburring Tools

Introduction

Thank you for choosing the RCBS Flash Hole Deburring Tools. This tool is designed to help you remove burrs from the inside of flash holes, ensuring more reliable ignition during reloading. To ensure your safety and the effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always read the instruction manual before using the product.
- Ensure that you are using the tool in a welllit and clean workspace.
- Keep the tool out of reach of children and pets.
- Inspect the tool for any damage before use; do not use if damaged.
- Wear appropriate personal protective equipment (PPE), such as safety glasses, to protect your eyes from debris.
- Report any unsafe conditions or accidents to the relevant authorities.
- Stay informed about product recalls and safety updates through the EU Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that the tool is securely held and properly aligned before use to avoid slips and accidents.
- Do not apply excessive force when using the tool; let it do the work to prevent injury.
- Avoid using the tool in wet or damp conditions to reduce the risk of electric shock or tool malfunction.
- Always store the tool in a safe place when not in use to prevent accidental injury.
- Be cautious of sharp edges and burrs that may remain after use; handle with care.
- Ensure the tool is properly cleaned after use to maintain its effectiveness and safety.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary materials and tools before beginning.
- Ensure you have a clean and organized workspace.

2. Installation of the Replacement Rod & Cutter:

- Remove the old rod and cutter from the tool if applicable.
- Insert the new replacement rod into the designated slot, ensuring it is securely positioned.
- Attach the cutter by following the specific instructions provided in the product manual.

3. Using the Flash Hole Deburring Tool:

- Position the selfcentering pilot collar over the flash hole of the cartridge.
- Adjust the stop to ensure proper depth of cut without removing excessive brass.
- Turn the tool gently in a clockwise direction to remove any burrs. Avoid applying too much pressure.
- After deburring, inspect the flash hole to ensure it is smooth and free of debris.

4. PostUsage Care:

- Clean the tool with a soft cloth to remove any brass shavings or debris.

- Store the tool in a safe place, preferably in its original packaging or a dedicated storage container.

Disposal Instructions

- Dispose of any damaged or wornout tools in accordance with local regulations.
- Recycle any metal parts where possible, following your local recycling guidelines.
- Do not dispose of tools in general waste if they contain hazardous materials; check local disposal regulations.

Contact Information for Further Support

For any inquiries regarding safety, usage, or product issues, please contact your local RCBS representative or visit the official RCBS website for more information. Always ensure you have the latest safety updates and product information.

Thank you for your attention to these safety guidelines. Proper use and care of the RCBS Flash Hole Deburring Tools will enhance your reloading experience and ensure safe operation.
