[Rifle Parts](#) > [Stock Parts](#) > [Buttstocks](#)

## Adjustable Carbine Stock With Internal Battery Storage

An enhanced version of the Magpul CTR® stock, the STR ("Storage/Type Restricted") buttstock features two 4¼" left- and right-side positioned battery storage tubes and a wider cheekweld for extra comfort. Rubber caps at the rear keep the storage compartments resistant to water incursion, yet pop off easily for access to two AA or two CR-123 batteries inside. Features two integral 1¼" sling loops. Includes reversible QD swivel socket. Friction locking mechanism minimizes wobble between the buffer tube and the buttstock for a solid, secure "feel", which is enhanced by the detachable .30" thick rubber rubber that adds plenty of "grab" to prevent shoulder slippage.

# Safety Instruction Guide for the AR15 STR Stock Collapsible MilSpec

## Introduction

Thank you for choosing the AR15 STR Stock Collapsible MilSpec by Magpul. This guide provides essential safety instructions and information to ensure safe and effective use of the product. Please read this guide thoroughly before installation and usage.

## General Safety Guidelines

- Ensure the product is used only as intended, following all instructions.
- Regularly inspect the stock for any signs of wear or damage before use.
- Keep the stock out of reach of children and unauthorized users.
- Always handle firearms safely and responsibly, following all applicable laws and regulations.
- Be aware of your surroundings and ensure a safe environment when using the firearm equipped with this stock.

## Specific Safety Precautions for Use

- **Battery Storage:**

- Do not store batteries in the stock for extended periods. Remove them if not in use.
- Ensure batteries are inserted correctly, observing the polarity markings.

- **Friction Locking Mechanism:**

- Regularly check the friction locking mechanism to ensure it is functioning correctly.
- Do not force the stock into position if it does not lock securely.

- **Sling Loops:**

- Ensure that slings are properly attached to the integral sling loops to avoid accidental detachment.

- **Cheekweld:**

- Adjust the stock for a proper cheekweld to ensure comfort and accuracy during use.

## Instructions for Installation and Usage

### Installation

1. **Prepare the Buffer Tube:**

- Ensure the buffer tube is clean and free of debris.
- Check that it is a milspec 1.14" O.D. carbine buffer tube.

2. **Attach the Stock:**

- Slide the stock onto the buffer tube until it reaches the desired position.
- Ensure the friction locking mechanism engages properly to minimize wobble.

3. **Check for Security:**

- Gently tug on the stock to ensure it is securely attached to the buffer tube.

## Usage

### 1. Adjusting Length of Pull (LOP):

- To adjust the LOP, pull the stock back or push it forward to the desired position.
- Ensure the adjustment clicks into place securely.

### 2. Using Battery Storage:

- To access the battery storage compartments, gently pop off the rubber caps at the rear of the stock.
- Store two AA or two CR123 batteries in each compartment as needed.

### 3. Using the Sling:

- Attach your sling to the integral sling loops as per your preference.
- Ensure the sling is securely fastened to prevent accidental detachment.

## Disposal Instructions

- Dispose of the stock in accordance with local regulations for plastic and polymer materials.
- Remove any batteries before disposal and recycle them according to local guidelines.
- If the product is damaged beyond repair, contact your local waste management authority for proper disposal methods.
