

5.56MM SUPPRESSOR ALIGNMENT ROD - GEISSELE AUTOMATICS

15" 5.56MM SUPPRESSOR ALIGNMENT ROD

[Gunsmith Tools](#) > [Rifle Tools](#) > [Barrel Tools](#)

The Geissele Suppressor Alignment rod is a precision gauge used to verify the alignment of a suppressor to the bore of a firearm barrel. Note: Suppressor alignment is determined by several factors: Centerline alignment (offset and angular) of the barrel threads to the bore. Perpendicularity of the barrel shoulder to the threads. Alignment of the muzzle device's internal diameter threads and torque shoulder to the suppressor attachment geometry. Alignment of the suppressor mounting ID geometry to the bore of the suppressor.

Attributes

- Name: [GEISSELE AUTOMATICS 15" 5.56MM SUPPRESSOR ALIGNMENT ROD](#)
- Manufacturer: [GEISSELE AUTOMATICS](#)
- Product no.: 100015135
- Mfr. No.: 10-259-F
- Weapon type: AR-15
- Delivery weight: 0.086kg
- Shipping height: 19mm
- Shipping width: 19mm
- Shipping length: 406mm
- UPC: 854014005243

Safety Instruction Guide for 5.56MM Suppressor Alignment Rod

Introduction

Thank you for choosing the Geissele 5.56MM Suppressor Alignment Rod. This precision gauge is designed to help you verify the alignment of a suppressor to the bore of a firearm barrel. Proper alignment is crucial for safe and effective firearm operation. Please read this safety instruction guide carefully to ensure safe usage and compliance with EU General Product Safety Regulations (GPSR).

General Safety Guidelines

- Always handle the alignment rod with care and keep it out of reach of children and vulnerable individuals.
- Ensure that the rod is used in a safe environment, free from distractions and potential hazards.
- Inspect the alignment rod before each use for any signs of damage or wear.
- Follow all manufacturer instructions and guidelines when using the alignment rod.
- Report any unsafe conditions or accidents involving the alignment rod to the appropriate authorities.
- Stay informed about product recalls and safety updates via the EU Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that the firearm is unloaded before using the alignment rod.
- Do not use the alignment rod if it appears damaged or malfunctioning.
- Avoid using the alignment rod in wet or humid conditions to prevent corrosion.
- Keep the alignment rod clean and free from debris to ensure accurate measurements.
- Use appropriate personal protective equipment (PPE) when handling firearms and accessories.

Instructions for Installation and Usage

1. Preparation:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Gather all necessary tools and materials for alignment.

2. Alignment Process:

- Remove the suppressor from the firearm.
- Attach the alignment rod to the firearm barrel, ensuring it fits snugly.
- Verify the centerline alignment of the barrel threads to the bore.
- Check the perpendicularity of the barrel shoulder to the threads.
- Inspect the alignment of the muzzle device's internal diameter threads and torque shoulder to the suppressor attachment geometry.
- Ensure that the suppressor mounting ID geometry aligns with the bore of the suppressor.

3. Final Checks:

- After alignment, doublecheck all measurements to confirm accuracy.
- Reattach the suppressor to the firearm, ensuring it is securely fastened.

Disposal Instructions

- Dispose of the alignment rod in accordance with local regulations.
- If the alignment rod is damaged beyond use, consider recycling materials where possible.

- Do not dispose of the alignment rod in regular household waste if it contains any hazardous materials.

Contact Information for Further Support

For any questions or concerns regarding the use of the Geissele 5.56MM Suppressor Alignment Rod, please refer to the manufacturer's website or customer support resources for assistance.

Thank you for your attention to these safety instructions. Your safety and the safety of others is our priority. Enjoy the precision and reliability of your Geissele Suppressor Alignment Rod.
