[Rifle Parts](#) > [Stock Parts](#) > [Buttstocks](#)

Weighing in just over 7 ounces, the BCMGUNFIGHTER™ Stock is one of the toughest and lightest polymer stocks for Mil-Spec receivers being made today. The Stock is designed slick, to prevent potential tangling with the end-user's sling, pouches, webbing or other gear and is designed with only five parts and one screw. Finally, each Stock is capped with an integrated, color matched rubber butt pad for secure placement in the shoulder pocket as well as increased overall durability. Featuring a new patent pending latch, the BCMGUNFIGHTER Stock reinvents the stock interface with a Mil-Spec buffer tube delivering both a precise engagement and a stock specifically engineered to dissipate impact stress through the assembly. The precision fit latch, made from heat-treated ordnance grade steel, is flat on all sides to ensure the Stock interface with the receiver extension cannot be obstructed by dirt or debris. Its unique geometry also provides increased torsional strength and eliminates the stress-riser found on conventional rounded pins. The Stock comes with both ambidextrous QD swivel sockets as well as a conventional sling attachment slot.
