[Rifle Parts](#) > [Grip Parts](#) > [Vertical Grips](#)

Low-profile length for increased mobility and decreased “snag” factor. The forward angle increases the rigidity of the forearm, while providing a more natural wrist angle. Can be mounted in reverse angle to increase control when grabbing handguard and grip. Flat sides with aggressive texture give better yaw control to the shooter during firing and non-firing manipulations. Anchor and bolt system offers a simple robust design, while maintaining a lightweight 1.9 ounces.
