

MASTER FUNNEL KIT - AREA 419 MASTER RELOADING FUNNEL KIT

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

Built as the Ultimate Reloading Tool

THE AREA 419 MASTER FUNNEL KIT The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck-diameter specific for each caliber. They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. NEW! Machined in handles to give you a grip if you like to grab the funnel from the side instead of top. Symmetrical design means the funnel no longer tips to the side. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! Billet Storage Block Machined in house from a solid billet of 6061-T6 aluminum, every single surface of the block is machined. Holds the funnel with or without a head attached as well as 10 spots for heads or drop tubes to be stored Front six head storage locations are engraved for standard calibers. Rubber feet on the bottom keep from sliding around on your bench This product listing is for the Master Funnel Kit, including the following: (1) Billet Funnel Body (6) Caliber Specific Color-Coded Heads (22 cal, 6mm/243, 6.5mm/264, 7mm/284, 30 cal, 338 cal) Calibers outside this list must be added separately, not part of a kit, please click link at left. (1) Billet Storage Block Drop tubes can be added but are NOT INCLUDED with the kit The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system: Static cling. Plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't fit. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. SPECIFICATIONS: Weight: 1 lbs Dimensions: 7 x 4 x 4 in Manufacturer : Area 419

Attributes

- Name: [AREA 419 MASTER RELOADING FUNNEL KIT](#)

Area 419 Master Funnel Kit Safety Instruction Guide

Introduction

Thank you for choosing the Area 419 Master Funnel Kit. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your funnel kit. Please read this manual carefully before using the product to avoid any potential hazards.

General Safety Guidelines

- Always use the funnel kit in a wellventilated area.
- Keep the funnel and its components out of reach of children and pets.
- Inspect the funnel and heads for any damage before each use. Do not use if damaged.
- Ensure that the funnel is securely attached to the case before pouring powder.
- Avoid using the funnel in environments with static electricity or flammable materials.
- Do not overload the funnel beyond its specified capacity.
- Always follow the manufacturer's instructions for use and maintenance.

Specific Safety Precautions for Use

- **Static Electricity:** Since the funnel is made of aluminum, it minimizes static cling. However, ensure that your workspace is free from static electricity to prevent powder from sticking.
- **Black Powder Safety:** The funnel is designed for use with black powder. Always handle black powder with care and follow safety protocols.
- **Handling Powder:** When pouring powder, do so slowly to prevent spillage. Avoid abrupt movements that could cause the funnel to tip.
- **Storage:** Store the funnel and heads in a dry place. Avoid exposing them to high temperatures or moisture.
- **Inspection:** Regularly check the heads for wear and tear. Replace any worn or damaged heads immediately.

Instructions for Installation and Usage

1. Assembly:

- Select the appropriate caliberspecific head for your needs.
- Thread the head onto the funnel body securely until fully tightened.

2. Using the Funnel:

- Place the funnel over the case, ensuring a snug fit.
- Slowly pour the powder into the funnel. The design promotes maximum flow and minimizes the risk of clogs.
- If using drop tubes, ensure they are securely attached and compatible with the funnel.

3. PostUse:

- After use, clean the funnel and heads with a soft brush or cloth to remove any residue.
- Store the funnel in the provided billet storage block to prevent damage.

4. Replacement of Heads:

- If you need to switch to a different caliber, unscrew the current head and replace it with the desired one, ensuring it is securely tightened.

Disposal Instructions

- Dispose of the funnel kit components in accordance with local regulations.
- Do not dispose of the funnel in regular household waste if it contains remnants of powder. Instead, follow specific disposal guidelines for hazardous materials.

Contact Information for Further Support

For any questions or concerns regarding the Area 419 Master Funnel Kit, please refer to the manufacturer's website or contact your local distributor for assistance.

Conclusion

By following these safety instructions, you can ensure a safe and effective reloading experience with the Area 419 Master Funnel Kit. Your safety is our priority, and we encourage you to report any unsafe products or accidents to the appropriate authorities. Thank you for your attention to these guidelines, and happy reloading!
