

S9 HANDGUN, SUBGUN & RIFLE CLEANING SYSTEM

[Gun Cleaning & Chemicals](#) > [Professional Cleaning Systems](#) > [Ultrasonic Cleaning Kits](#)

Tabletop Gun Cleaning System for Pistols, Sub Guns, and Rifles

The Infante Ultrasonic S9 is the most powerful tabletop system in the ultrasonic gun cleaning market for its size. The kit is designed to clean and lubricate pistols, sub guns and rifle parts up to 19" in length simultaneously. For parts longer than 19", you can clean diagonally then turn the part around to do overlapping halves. The system utilizes half of the tank size accessories so that you can clean in the front basket and leave the rear open for the lubrication setup. This is the most economical choice for cleaning longer gun parts without spending more money on a dedicated long gun cleaner. The S9 has a faster process with higher output for multiple gun cleaning than the S6 and has more length to accommodate the longer gun parts. 1 gallon of Sonic Tonic™ cleaning concentrate (Makes 22 gallons!) 2 gallons of Sonic Lube™ 2 Wire mesh suspension baskets with drain position handles 1 Lube pan 2 Tank lid covers (1 for tank , 1 for lube pan) The Infante Ultrasonic S9 features: High-grade stainless steel skirt with sound insulation, stainless tank, lube pan and covers. New and improved suspension baskets that allow liquids to conveniently drain back into the tank while examining parts. Extra heat added for faster startup time and no cold spots. Infante ultrasonic gun cleaning units have greater power and heat than any other competitor on the market and are backed by the Infante performance guarantee.

Safety Instruction Guide for S9 Handgun, Subgun & Rifle Cleaning System

Introduction

Thank you for choosing the Infante Ultrasonic S9 Handgun, Subgun & Rifle Cleaning System. This guide provides essential safety instructions and guidelines to ensure safe and effective use of the product. Please read this guide carefully before using the cleaning system.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as described in the product documentation.
- Always follow the manufacturer's instructions for setup, use, and maintenance.
- Keep the cleaning system out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of damage or wear before use.
- In case of malfunction or damage, discontinue use immediately and contact the manufacturer for support.
- Use only approved cleaning solutions and lubricants as specified by the manufacturer.
- Do not operate the cleaning system with wet hands or in a wet environment to avoid electric shock.
- Ensure proper ventilation in the area where the cleaning system is being used.
- Be cautious of hot surfaces during and after operation to prevent burns.

Specific Safety Precautions for Use

- Before using the ultrasonic cleaning system, ensure that all firearms and components are unloaded and safe.
- Do not place any items in the cleaning system that are not intended for ultrasonic cleaning.
- Avoid placing items that may be damaged by ultrasonic cleaning, such as delicate plastics or electronic components.
- Do not exceed the maximum load capacity of the cleaning system as specified in the product manual.
- Always monitor the cleaning process and never leave the system unattended while in operation.
- Follow the manufacturer's instructions for the correct setup of the cleaning and lubrication processes.
- Ensure that the cleaning tank is filled with the appropriate cleaning solution before starting the machine.
- After cleaning, allow items to cool down before handling to prevent burns.

Instructions for Installation and Usage

1. Setup:

- Place the cleaning system on a stable, flat surface away from direct sunlight and moisture.
- Ensure that the cleaning system is plugged into a properly grounded electrical outlet.
- Fill the cleaning tank with the appropriate Sonic Tonic™ cleaning concentrate as per the instructions provided (1 gallon makes 22 gallons).
- Place the wire mesh suspension baskets into the cleaning tank, ensuring they are securely positioned.

2. Operation:

- Turn on the cleaning system using the designated power switch.
- Select the appropriate cleaning time and temperature settings based on the items being cleaned.
- Carefully place the items to be cleaned into the baskets, ensuring they do not touch the bottom of the tank.
- Start the cleaning cycle and monitor the process to ensure safe operation.
- Once the cycle is complete, turn off the machine and carefully remove the baskets from the tank.

3. Lubrication:

- After cleaning, place the items in the lube pan and apply Sonic Lube™ as needed.
- Ensure that all lubricated parts are wiped clean to remove excess lubricant before reassembling.

Disposal Instructions

- Dispose of used cleaning solutions in accordance with local regulations.
- Recycle packaging materials where possible.
- Do not dispose of the product in household waste. Follow local guidelines for electronic waste disposal.

Contact Information for Further Support

For any questions or concerns regarding the S9 Handgun, Subgun & Rifle Cleaning System, please refer to the manufacturer's website or contact the customer support team directly. Ensure that you have the product details and any relevant information ready for efficient assistance.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with your Infante Ultrasonic S9 Handgun, Subgun & Rifle Cleaning System. Thank you for your attention to safety, and enjoy your cleaning experience!
