

PATTERNMAKERS' CABINET RASPS - APEX TOOL GROUP #50

CABINET RASP

[Gunsmith Tools](#) > [Stock Work & Finishing](#) > [Stock Making Hand Tools](#) > [Patternmakers Cabinet Rasps](#)

Favorite Of Professional Stockmakers For Shaping & Finishing

The famous Nicholson Shoemakers' and Patternmakers' Cabinet Rasps made especially for wood filing where a smooth finish is desired. Comes in two cuts, second or smooth, 10" long cutting surface. Rasp is half-round shape, but slightly wider than usual with wider radius also. Edges are cut (have teeth) and taper slightly from tang to front. We have been looking for these for many years at the suggestion of many, many good gunsmith and stockmaker customers and friends. The unusual tooth design eliminates most "filling" problems, does not gouge into wood or snag cross-grain. Probably the most useful wood rasp for "almost final" shaping and finishing. Teeth are coarser than the Wood Files.

Attributes

- Name: [APEX TOOL GROUP #50 CABINET RASP](#)
- Manufacturer: [APEX TOOL GROUP](#)
- Product no.: 191188610
- Mfr. No.: 18861N

PATTERNMAKERS' CABINET RASPS SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the PATTERNMAKERS' CABINET RASPS by APEX TOOL GROUP. These tools are designed for wood filing, providing a smooth finish and ensuring precision in your woodworking projects. This safety instruction guide outlines essential safety guidelines, precautions, and proper usage instructions to ensure your safety and the effectiveness of the product.

General Safety Guidelines

- Always read and understand the safety instructions before using the rasps.
- Use the rasps only for their intended purpose, which is wood filing.
- Keep the rasps out of reach of children and vulnerable individuals.
- Inspect the rasps for any damage or wear before each use. Do not use damaged tools.
- Store the rasps in a safe place, away from moisture and extreme temperatures.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves, to protect against wood splinters and debris.
- Ensure the workpiece is secured before starting to rasp to prevent movement.
- Avoid using excessive force while rasping; let the tool do the work to reduce the risk of injury and damage to the wood.
- Be cautious of the rasp's edges, which are sharp and can cause cuts. Handle with care.
- Do not use the rasp on materials other than wood, as this may cause damage to the tool and create hazardous situations.

Instructions for Installation and Usage

1. Preparation:

- Select the appropriate rasp based on the finish you desire (#49 for second cut, #50 for smooth cut).
- Ensure your workspace is clean and welllit.

2. Using the Rasp:

- Hold the rasp firmly by the tang, ensuring your fingers are away from the cutting edges.
- Position the rasp against the wood at an angle that allows for effective filing.
- Apply even pressure while moving the rasp in a forward motion. Lift the rasp off the wood on the return stroke to avoid dulling the teeth.
- Check your progress frequently to ensure you are achieving the desired shape and finish.

3. PostUse Care:

- Clean the rasp after use to remove wood dust and debris. A brush or cloth can be used for this purpose.
- Store the rasp in a protective case or sheath to prevent damage to the teeth and edges.

Disposal Instructions

- Dispose of the rasp in accordance with local regulations for metal tools.
- If the rasp is damaged beyond repair, ensure it is disposed of in a way that prevents injury to others.

Contact Information for Further Support

For any questions or concerns regarding the safety or use of the PATTERNMAKERS' CABINET RASPS, please refer to the official APEX TOOL GROUP website or contact your local distributor for assistance.

By following these safety instructions, you can ensure a safe and effective experience while using the PATTERNMAKERS' CABINET RASPS. Thank you for prioritizing safety in your woodworking projects.
