

HOT BUTTON - UNITY TACTICAL HOT BUTTON RAIL MOUNT NGAL LASER 6" MODE SELECT SWITCH FDE

[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Accessories](#)

Hot Button is a revolutionary control device for weapon-mounted electronic accessories. Developed out of a need to conserve rail-estate, improve actuation ergonomics, and mechanically integrate with weapon fore ends, Hot Button has successfully reinvented how you interface with your lights and lasers. The first major innovation is the button angle. Legacy remote tape switches feature a flat pad that forces users to strain their thumbs in an unnatural angle to apply consistent pressure to activate a momentary function. Hot Button presents the activation button at a 45-degree angle for an exponentially more comfortable press. This is especially important when activating the button under pressure. A raised, crenelated bezel protects the button from accidental actuation, while providing a tactile index point for the user's thumb. Because Hot Button is angled, the overall footprint is much smaller than factory OEM pressure pads. Not only does this clean up rails on traditional weapons, but it greatly increases the accessory layout options on smaller SMG and PDW's. If that weren't enough, we have designed two separate versions of Hot Button that will attach directly to either Mil-Std M1913 Picatinny or M-LOK rail interface. Both rail systems are approved and standardized by the US Department of Defense for use on issued weapons. Hot Button secures to these rails with hardware, eliminating the need for Velcro, 100mph Tape, or Zip Ties. This secure attachment method ensures your switches stay on the gun (in the location you placed them) regardless of battlefield abuse. Hot Button is available for standard Surefire tail caps and standard Crane-Style laser ports (found in B.E. Meyers, Holosun, Insight/L-3, Steiner, and Wilcox products).

Attributes

- Name: [UNITY TACTICAL HOT BUTTON RAIL MOUNT NGAL LASER 6" MODE SELECT SWITCH FDE](#)
- Manufacturer: [UNITY TACTICAL](#)
- Product no.: 430100011
- Mfr. No.: HBR-NFM
- Colour: Flat Dark Earth
- Delivery weight: 0.045kg
- Shipping height: 64mm
- Shipping width: 89mm
- Shipping length: 127mm

HOT BUTTON UNITY TACTICAL HOT BUTTON RAIL MOUNT NGAL LASER 6" MODE SELECT SWITCH

FDE Safety Instruction Guide

Introduction

Thank you for choosing the Hot Button Unity Tactical Hot Button Rail Mount NGAL Laser 6" Mode Select Switch. This innovative control device is designed for weapon-mounted electronic accessories, enhancing ergonomics and functionality. To ensure safe usage and compliance with the EU General Product Safety Regulation (GPSR), please read this safety instruction guide carefully.

General Safety Guidelines

- **Product Safety:** Ensure safe use of the Hot Button by following the instructions provided in this guide. Always handle the product with care to avoid potential risks.
- **Enhanced Recalls:** Stay informed about any recalls or safety notices related to this product. You can check for updates on the EU's Safety Gate platform.
- **Online Shopping:** If purchased online, ensure that the retailer complies with safety requirements similar to those of physical stores.
- **Special Consumer Focus:** This product is not intended for use by children. Keep it out of reach to prevent any accidental misuse.
- **EU Contact Point:** For safety inquiries, please contact the relevant EU-based authority or retailer.
- **Rapid Alerts:** Be aware of the Safety Gate system for quick updates on unsafe products.

Specific Safety Precautions for Use

- **Proper Handling:** Always handle the Hot Button with clean hands and avoid touching the activation button unnecessarily to prevent accidental activation.
- **Avoid Excessive Force:** Do not apply excessive force when pressing the activation button. The design allows for a comfortable press without straining your fingers.
- **Check Compatibility:** Ensure that the Hot Button is compatible with your weapon system before installation. Refer to the specifications for MilStd M1913 Picatinny or MLOK rail interfaces.
- **Secure Attachment:** Always secure the Hot Button to the rail using the provided hardware. Avoid using alternative attachment methods such as Velcro or tape.
- **Environmental Considerations:** Avoid exposing the Hot Button to extreme temperatures, moisture, or corrosive substances to maintain its functionality.

Instructions for Installation and Usage

Installation

- **Step 1:** Gather the necessary tools for installation, including a screwdriver and the provided mounting hardware.
- **Step 2:** Ensure the weapon is unloaded and safe to work on before starting the installation.
- **Step 3:** Select the appropriate rail interface (MilStd M1913 Picatinny or MLOK) for your weapon.
- **Step 4:** Align the Hot Button with the rail and secure it using the provided hardware. Make sure it is firmly attached and does not move.
- **Step 5:** Check the button angle to ensure it is positioned correctly for comfortable activation.

Usage

- **Activating the Device:** Press the activation button at a 45-degree angle for optimal comfort. Ensure your thumb is resting on the raised bezel for tactile feedback.

- **Momentary Function:** The Hot Button is designed for momentary activation. Release the button to deactivate the light or laser.
- **Under Pressure:** Practice activating the button under simulated pressure to become familiar with its operation during highstress situations.

Disposal Instructions

- **Environmental Responsibility:** Dispose of the Hot Button in accordance with local regulations for electronic waste. Do not throw it in regular household waste.
- **Recycling:** Where possible, recycle the product components. Check with local recycling centers for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the Hot Button, please contact your local retailer or the relevant EUbased authority for assistance.
