## An Ambidextrous Charging Handle Designed for Your AR-15

One of the most critical components on your AR-15 is the charging handle, since it gives you complete control over your gun's firing status. Because of that, you need a charging handle that's easy to use and durable, and Aero Precision has the perfect option in the form of its Breach Ambidextrous Charging Handle. Each Aero Precision Breach Charging Handle can be had in two different sizes, so you can choose the one that best meets your needs. The smaller of the two levers provides a sleek design that blends in with the overall lines of your rifle without creating any snag points, but it still provides a comfortable, ergonomic surface for easy racking. The larger of the two levers gives you more surface area for instant, easy activation of the lever, whether through rapid one-handed racking or other motions. The Aero Precision Breach Charging Handle is machined from 7075 aluminum and is treated with a hardcoat-anodized finish. Like all of Aero's products, this handle is made right here in the USA.
