

# ASSAULT BACK PANEL CORE - MULTICAM ARID

[Home](#)

The top of the Panel features a custom double pull, separating zipper. This zipper serves three purposes. It allows the Flaps to be completely removed from the Core and swapped out. It allows communication antennas and other items such as cabling, hydration tubes, and breaching tools to be routed into and out of the top of the panel. It provides quick access to the inside of the panel without lifting the entire Flap. The Assault Panel Core also has three direction snaps to hold Flaps securely on and to keep tools held inside the panel. The Assault Panel Core features 4 external attachment zippers. These zippers allow the panel to be worn in three configurations. Configuration 1 uses the top zippers to attach the panel to the plate bag. This compresses the panel and allows the panel to be worn in a "light" configuration. This configuration of the panel is great for assaulters who want a streamlined and tight configuration and only need to carry things like a small hydration bladder, slap charges, flash bangs and GP kit on their backs. Configuration 2 uses the bottom zippers to attach the panel to the plate bag. This configuration gives the user much more capacity and configures the panel into more of a backpack. This provides the same features as Configuration 1, but with the added volume for bulky items such as radios, cold weather gear, poll less litters, etc. Configuration 3 also uses the bottom zippers to attach to the rear plate bag, but introduces the bottom expansion as well. This expansion offers the ability to carry longer tools and store even more bulky items in the expanded space. The Assault Panel Core comes standard with a permanently affixed large GP pocket on the lower half. This pocket is velcro lined for attachment of accessory items. It features a total of two tie down locations inside the pouch for securing sensitive equipment. The front of the pouch features a zippered stash pocket for organizing smaller, commonly needed items. This pocket also has a 4" x 5" Velcro Field for attaching identification patches. Behind the GP pocket is a hidden stash compartment. This is used for storing the lower half of slap charges or breach pens when they are passed through the flaps above. It can also be used to stash E&E equipment or smaller personal items. Each side of the panel features six tie down loops for securing longer items external to the panel. These loops are great for attaching Tri-Fold or Bi-Fold charges or other tall items. The bottom expansion has a G-Hook internal to the panel that allows you to secure it in place if a heavier load needs to be carried inside, but you do not want the expansion to deploy inadvertently. Fitment Guide Medium Overt Plate Bags - Fits Large Overt Plate Bags - Fits, could use an XL Adapter if you have very thick plates, and are overloading the panel. Extra Large Overt Plate Bags - Needs an XL Adapter to be compatible with the XL Plate Bags. Some images shown with optional accessories, sold separately.

## Attributes

- Name: [ASSAULT BACK PANEL CORE - MULTICAM ARID](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101883
- Mfr. No.: PC-AP-MA
- Color: Multi-Cam
- Delivery weight: 0.503kg

- Shipping height: 38mm
- Shipping width: 267mm
- Shipping length: 203mm

## Safety Instruction Guide

### Introduction

Thank you for choosing the ASSAULT BACK PANEL CORE MULTICAM ARID. This guide provides essential safety instructions and information to ensure the safe use of the product. Please read this guide carefully before using the product to understand how to use it safely and effectively.

### General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Regularly inspect the panel for any wear and tear that may compromise safety.
- Keep the panel away from sharp objects that could damage it.
- Ensure all zippers and attachments are functioning properly before use.
- Do not overload the panel beyond its capacity to avoid injury or damage.
- Keep the panel away from fire and extreme heat sources.
- Store the panel in a cool, dry place when not in use.

### Specific Safety Precautions for Use

- Always ensure that the panel is securely attached to your equipment before use.
- When using the configuration options, ensure that all zippers are fully closed to prevent items from falling out.
- Be cautious when routing communication antennas or cables to avoid snagging or entanglement.
- Use caution when accessing pockets and compartments to avoid injury from sharp tools or equipment.
- Ensure that the panel does not obstruct your movement or visibility while in use.
- If carrying heavy or bulky items, adjust the panel's configuration to distribute weight evenly.

### Instructions for Installation and Usage

#### 1. Attaching the Panel:

- **Configuration 1:** Use the top zippers to attach the panel to the plate bag for a light configuration.
- **Configuration 2:** Use the bottom zippers to attach the panel for increased capacity, transforming it into a backpack style.
- **Configuration 3:** Utilize the bottom zippers and expand the bottom section for carrying longer tools and bulkier items.

#### 2. Using the Custom Double Pull Zipper:

- To remove the Flaps, pull the zipper fully to separate them from the Core.
- For routing communication antennas and cables, open the top zipper and guide the items through as needed.
- To gain quick access to the inside of the panel, unzip the top section without removing the entire Flap.

#### 3. Using the GP Pocket:

- The large GP pocket on the lower half is velcro lined for attaching accessories.
- Use the two tiedown locations inside the pocket to secure sensitive equipment.
- Organize smaller items in the zippered stash pocket located on the front of the GP pocket.

#### **4. Securing Longer Items:**

- Utilize the six tiedown loops on each side of the panel for securing longer items.
- Ensure items are securely fastened to prevent them from falling during movement.

#### **5. Using the Bottom Expansion:**

- The GHook inside the bottom expansion can be used to secure the expansion in place when carrying heavier loads.

## **Disposal Instructions**

- Dispose of the product responsibly in accordance with local regulations.
- Do not burn the product, as it may release harmful chemicals.
- If the product is no longer usable, consider recycling any components that can be recycled.

## **Contact Information for Further Support**

For any inquiries regarding safety or product use, please contact the manufacturer or your retailer for assistance. Always refer to the manufacturer's website or customer service for the most accurate and up-to-date information.

## **Conclusion**

By following the safety guidelines and instructions outlined in this guide, you can ensure a safe and effective experience with the ASSAULT BACK PANEL CORE MULTICAM ARID. Thank you for your attention to safety, and enjoy your product!
