

ELASTIC HOOK & LOOP CUMMERBUND - SPIRITUS SYSTEMS

ELASTIC HOOK & LOOP CUMMERBUND (SIZE 1) - MULTICAM ARID

[Home](#)

Assault Panel Core The Assault Panel Core was designed to be a multi-mission back panel attachment to your LV-119 OVERT Rear Plate Bag. We designed the Panel to fill a spectrum of needs ranging from a light weight Assault Panel, to a more robust Pack Panel. The panel is both expandable and modular and can accommodate a plethora of equipment to meet almost any operational need. The Assault Panel Core attaches to your LV-119 Rear Plate Bag using a combination of 6 directional snaps, and 2 full length zippers. It also utilizes two stabilizers that route inside of the Rear Plate Bag if the Panel is used in "Configuration 2 or 3" listed below. The Panel has a removable flap system that allows the user to configure the upper half of the Panel to meet their mission needs. (Flaps are sold separately, the Assault Panel Core does NOT come with a flap.) This eliminates the need to have multiple panels and allows for quicker donning and doffing of mission essential equipment. NOTE: This LV/119 Cummerbund is designed for use with a front and rear LV/119 plate bag. The 5-Inch Elastic Cummerbund is a simple and effective solution for professionals who need to carry and have rapid access to additional ammunition and equipment on their sides while still maintaining a low profile. Side loading is great for ground vehicle and low visibility operations. Elastic cells are 3 inches wide and are built around standard 5.56 Magazines, such as the PMAG. Elastic cummerbunds prevent user fatigue while worn for long durations, as they stretch with the body during active maneuvers. By using 5-Inch Elastic, we allow for the stable carriage of taller items as they are held more securely. The sewn-on pull tabs allow for the use of the Bungee Retention Kit to securely hold items for HALO, OTB, or other kinetic operations. The tabs also allow users to pull on the cell and make it easier to load and extract equipment. The Elastic Hook & Loop Cummerbund features premium, Berry Amendment Compliant materials sourced from industry leaders in textiles manufacturing. It offers superior construction processes, including triple stitching on the elastic cells to prolong life and prevent cell failure when stuffed with-non standard or oddly shaped items. **Cummerbund Attachment** The cummerbund attachment is a proprietary system that allows for the use of all of Spiritus Systems cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Hook & Loop is not utilized as an attachment method on the rear plate bag. Hook & Loop wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Hook & Loop doesn't handle weight well and it sticks to everything, especially cloth seats. **SIZING** The cummerbund comes in two sizes: Size 1 and Size 2, each offering up to 14 inches of total adjustment. This allows for a proper fitment for all body types. To figure our appropriate sizing, take measurement of the waist at the belly button. When measuring, users should dress as they would while actually wearing the carrier. For example, if the user is operating in arctic environments, they should be wearing cold weather equipment when measuring. Size 1: 28" to 42" Size 2: 40" to 54" **SOLD AS A SET.** If your waist measurement is 42", we suggest going up to the Size 2 cummerbund. NOTE: The LV119 Cummerbund is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Rear Plate Bag,

Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

Attributes

- Name: [SPIRITUS SYSTEMS ELASTIC HOOK & LOOP CUMMERBUND \(SIZE 1\) - MULTICAM ARID](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101895

Safety Instruction Guide for ELASTIC HOOK & LOOP CUMMERBUND

Introduction

Thank you for choosing the ELASTIC HOOK & LOOP CUMMERBUND by Spiritus Systems. This product is designed to provide a versatile and secure solution for carrying essential equipment during various operational scenarios. It is crucial to read and follow these safety instructions to ensure safe use and compliance with relevant regulations.

General Safety Guidelines

- Ensure that the cummerbund is used only for its intended purpose as specified in the product description.
- Regularly inspect the cummerbund for any signs of wear or damage before each use. Do not use if damaged.
- Keep the cummerbund away from sharp objects and extreme heat sources to prevent material degradation.
- Store the cummerbund in a cool, dry place when not in use to maintain material integrity.
- This product is not a toy. Keep it out of reach of children and vulnerable individuals.
- If you experience any discomfort while wearing the cummerbund, discontinue use immediately and consult a professional.

Specific Safety Precautions for Use

- Ensure proper sizing before use. Measure your waist at the belly button and refer to the sizing chart:
 - Size 1: 28" to 42"
 - Size 2: 40" to 54"
- When wearing the cummerbund, ensure that it is securely fastened to prevent accidental release during operation.
- Avoid overloading the elastic cells beyond their intended capacity, as this may lead to failure.
- When using the cummerbund in conjunction with other equipment, ensure compatibility to avoid interference with movement or safety.
- Be cautious when operating in environments where the cummerbund may become snagged or entangled.

Instructions for Installation and Usage

1. **Preparation:** Before installation, ensure that you have all necessary components and that the cummerbund is in good condition.
2. **Attaching the Cummerbund:**
 - Open the rear plate bag and locate the attachment points for the cummerbund.
 - Insert the cummerbund into the designated slots inside the plate bag.
 - Adjust the cummerbund to achieve a snug fit, ensuring comfort and security.
3. **Adjusting Fit:**
 - Use the adjustment mechanisms to modify the size of the cummerbund as needed.
 - Ensure that the cummerbund is not too tight or too loose, as this could affect performance and comfort.
4. **Final Check:**
 - Confirm that all attachment points are secure and that the cummerbund is properly positioned.
 - Perform a final inspection to ensure that there are no obstructions or potential hazards.

Disposal Instructions

- When the cummerbund has reached the end of its usable life, dispose of it in accordance with local regulations.
- Do not dispose of the cummerbund in regular household waste if it contains hazardous materials.
- Consider recycling options if available, as some components may be recyclable.

Contact Information for Further Support

For any inquiries regarding safety or product issues, please refer to your local Spiritus Systems representative or authorized dealer. It is important to have an EUbased contact for any safetyrelated questions or concerns.

Conclusion

By following these safety instructions, you can ensure the effective and safe use of your ELASTIC HOOK & LOOP CUMMERBUND. Always prioritize safety and compliance with the EU General Product Safety Regulation. Thank you for your attention to these guidelines, and we wish you safe and successful operations.
