

ELASTIC HOOK & LOOP CUMMERBUND - SPIRITUS SYSTEMS

ELASTIC HOOK & LOOP CUMMERBUND (SIZE 1) - MULTICAM BLACK

[Home](#)

Assault Panel Core The Assault Panel Core was designed to be a multi-mission back panel attachment to your LV-119 OVERT Rear Plate Bag. We designed the Panel to fill a spectrum of needs ranging from a light weight Assault Panel, to a more robust Pack Panel. The panel is both expandable and modular and can accommodate a plethora of equipment to meet almost any operational need. The Assault Panel Core attaches to your LV-119 Rear Plate Bag using a combination of 6 directional snaps, and 2 full length zippers. It also utilizes two stabilizers that route inside of the Rear Plate Bag if the Panel is used in "Configuration 2 or 3" listed below. The Panel has a removable flap system that allows the user to configure the upper half of the Panel to meet their mission needs. (Flaps are sold separately, the Assault Panel Core does NOT come with a flap.) This eliminates the need to have multiple panels and allows for quicker donning and doffing of mission essential equipment. NOTE: This LV/119 Cummerbund is designed for use with a front and rear LV/119 plate bag. The 5-Inch Elastic Cummerbund is a simple and effective solution for professionals who need to carry and have rapid access to additional ammunition and equipment on their sides while still maintaining a low profile. Side loading is great for ground vehicle and low visibility operations. Elastic cells are 3 inches wide and are built around standard 5.56 Magazines, such as the PMAG. Elastic cummerbunds prevent user fatigue while worn for long durations, as they stretch with the body during active maneuvers. By using 5-Inch Elastic, we allow for the stable carriage of taller items as they are held more securely. The sewn-on pull tabs allow for the use of the Bungee Retention Kit to securely hold items for HALO, OTB, or other kinetic operations. The tabs also allow users to pull on the cell and make it easier to load and extract equipment. The Elastic Hook & Loop Cummerbund features premium, Berry Amendment Compliant materials sourced from industry leaders in textiles manufacturing. It offers superior construction processes, including triple stitching on the elastic cells to prolong life and prevent cell failure when stuffed with non standard or oddly shaped items.

Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of Spiritus Systems cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Hook & Loop is not utilized as an attachment method on the rear plate bag. Hook & Loop wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Hook & Loop doesn't handle weight well and it sticks to everything, especially cloth seats.

SIZING The cummerbund comes in two sizes: Size 1 and Size 2, each offering up to 14 inches of total adjustment. This allows for a proper fitment for all body types. To figure our appropriate sizing, take measurement of the waist at the belly button. When measuring, users should dress as they would while actually wearing the carrier. For example, if the user is operating in arctic environments, they should be wearing cold weather equipment when measuring. Size 1: 28" to 42" Size 2: 40" to 54"

SOLD AS A SET. If your waist measurement is 42", we suggest going up to the Size 2 cummerbund. NOTE: The LV119 Cummerbund is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Rear Plate Bag,

Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

Attributes

- Name: [SPIRITUS SYSTEMS ELASTIC HOOK & LOOP CUMMERBUND \(SIZE 1\) - MULTICAM BLACK](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101896

Safety Instruction Guide for ELASTIC HOOK & LOOP CUMMERBUND

Introduction

Thank you for choosing the ELASTIC HOOK & LOOP CUMMERBUND by Spiritus Systems. This product is designed to enhance your operational capabilities while ensuring comfort and safety. Please read this safety instruction guide carefully to ensure proper use and to minimize any potential risks.

General Safety Guidelines

To ensure safe usage of the ELASTIC HOOK & LOOP CUMMERBUND, please follow these general safety guidelines:

- Always inspect the cummerbund before each use for any signs of wear, damage, or defects.
- Ensure that the cummerbund is properly fitted to avoid discomfort or injury during use.
- Be aware of your surroundings and avoid situations where the cummerbund could become snagged or caught.
- Do not overload the cummerbund with excessive weight, as this can lead to failure of the attachment system.
- Store the cummerbund in a cool, dry place when not in use to prevent degradation of materials.

Specific Safety Precautions for Use

When using the ELASTIC HOOK & LOOP CUMMERBUND, please observe the following safety precautions:

- **Proper Fit:** Measure your waist at the belly button to ensure the correct size. Refer to the sizing information provided in the product description.
- **Clothing Considerations:** When measuring for fit, wear clothing similar to what you would wear in operational conditions (e.g., cold weather gear for arctic environments).
- **Weight Distribution:** Distribute weight evenly across the cummerbund to maintain balance and prevent strain.
- **Avoid Sharp Objects:** Be cautious of sharp objects that may puncture or damage the cummerbund during use.
- **Children and Vulnerable Groups:** This product is not designed for use by children. Ensure that only trained adults use the cummerbund.

Instructions for Installation and Usage

To properly install and use the ELASTIC HOOK & LOOP CUMMERBUND, follow these steps:

1. Sizing:

- Determine your size using the following measurements:
 - Size 1: 28" to 42"
 - Size 2: 40" to 54"
- If your waist measurement is at the upper end of Size 1 (42"), consider selecting Size 2 for better comfort.

2. Attachment:

- Attach the cummerbund inside the LV119 Rear Plate Bag using the provided directional snaps and zippers.

- Ensure that the cummerbund is securely fastened to prevent it from coming loose during use.

3. Adjustment:

- Adjust the cummerbund to fit snugly around your waist. It should not be too tight to cause discomfort or too loose to shift during movement.
- Utilize the stabilizers if using the cummerbund in "Configuration 2 or 3" for added stability.

4. Loading Equipment:

- Load equipment and ammunition into the elastic cells, ensuring they are properly secured.
- Use the sewnon pull tabs to assist in loading and extracting items.

5. Removing the Cummerbund:

- To remove the cummerbund, carefully detach it from the plate bag, ensuring no equipment is caught or snagged.

Disposal Instructions

When the ELASTIC HOOK & LOOP CUMMERBUND reaches the end of its life or is no longer needed, please dispose of it responsibly:

- Check local regulations for proper disposal of textile materials.
- If the cummerbund is damaged or no longer usable, consider recycling the materials if possible.
- Do not dispose of the cummerbund in regular household waste if it contains any hazardous materials.

Contact Information for Further Support

For any inquiries regarding safety, usage, or product support, please refer to the official Spiritus Systems website or contact your local distributor.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of the ELASTIC HOOK & LOOP CUMMERBUND. Always prioritize safety and proper usage to maximize the benefits of this product. Thank you for your attention to these guidelines.
