## **ELASTIC HOOK & LOOP CUMMERBUND (SIZE 2) - WOODLAND**

[Home](#)

**Assault Panel Core** The Assault Panel Core was designed to be a multi-mission back panel attachment to your LV-119 OVERT Rear Plate Bag. We designed the Panel to fill a spectrum of needs ranging from a light weight Assault Panel, to a more robust Pack Panel. The panel is both expandable and modular and can accommodate a plethora of equipment to meet almost any operational need. The Assault Panel Core attaches to your LV-119 Rear Plate Bag using a combination of 6 directional snaps, and 2 full length zippers. It also utilizes two stabilizers that route inside of the Rear Plate Bag if the Panel is used in "Configuration 2 or 3" listed below. The Panel has a removable flap system that allows the user to configure the upper half of the Panel to meet their mission needs. (Flaps are sold separately, the Assault Panel Core does NOT come with a flap.) This eliminates the need to have multiple panels and allows for quicker donning and doffing of mission essential equipment. NOTE: This LV/119 Cummerbund is designed for use with a front and rear LV/119 plate bag. The 5-Inch Elastic Cummerbund is a simple and effective solution for professionals who need to carry and have rapid access to additional ammunition and equipment on their sides while still maintaining a low profile. Side loading is great for ground vehicle and low visibility operations. Elastic cells are 3 inches wide and are built around standard 5.56 Magazines, such as the PMAG. Elastic cummerbunds prevent user fatigue while worn for long durations, as they stretch with the body during active maneuvers. By using 5-Inch Elastic, we allow for the stable carriage of taller items as they are held more securely. The sewn-on pull tabs allow for the use of the Bungee Retention Kit to securely hold items for HALO, OTB, or other kinetic operations. The tabs also allow users to pull on the cell and make it easier to load and extract equipment. The Elastic Hook & Loop Cummerbund features premium, Berry Amendment Compliant materials sourced from industry leaders in textiles manufacturing. It offers superior construction processes, including triple stitching on the elastic cells to prolong life and prevent cell failure when stuffed with-non standard or oddly shaped items.

**Cummerbund Attachment** The cummerbund attachment is a proprietary system that allows for the use of all of Spiritus Systems cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Hook & Loop is not utilized as an attachment method on the rear plate bag. Hook & Loop wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Hook & Loop doesn't handle weight well and it sticks to everything, especially cloth seats.

**SIZING** The cummerbund comes in two sizes: Size 1 and Size 2, each offering up to 14 inches of total adjustment. This allows for a proper fitment for all body types. To figure our appropriate sizing, take measurement of the waist at the belly button. When measuring, users should dress as they would while actually wearing the carrier. For example, if the user is operating in arctic environments, they should be wearing cold weather equipment when measuring. Size 1: 28" to 42" Size 2: 40" to 54"

**SOLD AS A SET.** If your waist measurement is 42", we suggest going up to the Size 2 cummerbund. NOTE: The LV119 Cummerbund is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Rear Plate Bag,

Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

## Attributes

- Name: [SPIRITUS SYSTEMS ELASTIC HOOK & LOOP CUMMERBUND \(SIZE 2\) - WOODLAND](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101903
- Mfr. No.: PC-EV-WD-S2
- Colour: Woodland
- Delivery weight: 0.357kg
- Shipping height: 38mm
- Shipping width: 165mm
- Shipping length: 229mm

# Safety Instructions for the ELASTIC HOOK & LOOP CUMMERBUND

## Introduction

Thank you for choosing the ELASTIC HOOK & LOOP CUMMERBUND by Spiritus Systems. This product is designed to enhance your operational capabilities while ensuring safety and comfort. Please read this safety instruction guide carefully to ensure proper use and maintenance of the cummerbund.

## General Safety Guidelines

- Ensure the product is used only for its intended purpose as described in the product specifications.
- Regularly inspect the cummerbund for any signs of wear, damage, or malfunction before each use.
- Keep the cummerbund out of reach of children and vulnerable individuals when not in use.
- Do not modify or alter the cummerbund in any way, as this may compromise safety and performance.
- Be aware of your surroundings and the equipment you are using in conjunction with the cummerbund to avoid accidents.

## Specific Safety Precautions for Use

- Always ensure that the cummerbund is securely fastened before engaging in any activities.
- When using the cummerbund in highstress environments, check that all attachments and components are functioning properly.
- Avoid overloading the elastic cells with equipment that exceeds their designed capacity, which can lead to failure.
- When operating in extreme conditions (e.g., cold weather), ensure that clothing worn beneath the cummerbund does not interfere with its function.
- If you experience any discomfort while wearing the cummerbund, remove it immediately and assess the fit and adjustment.

## Instructions for Installation and Usage

### 1. Sizing:

- Size 1: 28" to 42"
- Size 2: 40" to 54" If your measurement is at the upper limit, consider selecting the next size up for comfort.

### 2. Installation:

- Attach the cummerbund inside your LV119 Rear Plate Bag using the proprietary attachment system.
- Ensure that the cummerbund is properly aligned and secured to avoid shifting during use.
- Adjust the cummerbund to fit snugly against your body without restricting movement or circulation.

### 3. Usage:

- Load the elastic cells with equipment such as magazines, ensuring that they are properly seated.
- Utilize the pull tabs for easier loading and extraction of equipment.
- When transitioning between different configurations, refer to the specific setup instructions provided in the product manual.

## Disposal Instructions

- Dispose of the cummerbund in accordance with local regulations for textile waste.
- Do not burn the cummerbund, as it may release harmful substances.
- If the cummerbund is damaged beyond repair, consider recycling it if possible.

## Contact Information for Further Support

For any safety inquiries or concerns regarding the ELASTIC HOOK & LOOP CUMMERBUND, please refer to the contact information provided with your product packaging or visit the manufacturer's official website.

## Conclusion

By following these safety instructions, you can ensure a safe and effective experience with your ELASTIC HOOK & LOOP CUMMERBUND. Regular maintenance and proper usage are essential for maximizing the lifespan and functionality of the product. Thank you for your attention to safety, and we wish you success in your endeavors.
