

OTB OVERT REAR PLATE BAG - OTB LV-119 REAR OVERT PLATE BAG (MEDIUM) - MULTICAM

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate comms cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our tubes cummerbund. Plate Fitment The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x 13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

Attributes

- Name: [OTB LV-119 REAR OVERT PLATE BAG \(MEDIUM\) - MULTICAM](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101961
- Mfr. No.: PC-RB-MC-MD
- Color: Multi-Cam
- Delivery weight: 0.218kg
- Shipping height: 25mm
- Shipping width: 254mm
- Shipping length: 191mm

OTB OVERT Rear Plate Bag Safety Instructions

Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag. This product is designed to provide enhanced load carriage and support during seaborne operations. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- **Product Safety:** Ensure that the bag is used only for its intended purpose. Misuse may lead to injury or damage.
- **Enhanced Recalls:** Stay informed about any product recalls or safety alerts. Follow the instructions provided in recall notices.
- **Online Shopping:** Purchase this product only from authorized retailers to ensure it meets safety standards.
- **Special Consumer Focus:** This product is not intended for use by children. Keep it out of reach of minors.
- **EU Contact Point:** For safety inquiries, please refer to the contact information provided by your retailer.
- **Rapid Alerts:** Regularly check for updates on product safety via the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - Ensure the bag is free from any defects before use.
 - Inspect for wear and tear regularly.
 - Avoid exposure to sharp objects that may puncture the mesh material.
- **Avoiding Hazards:**
 - Do not overload the bag beyond its capacity.
 - Ensure all zippers and attachments are securely fastened before use.
 - Be cautious when using the bag in wet conditions to prevent slipping.
- **AgeSpecific Warnings:**
 - This product is designed for adult users only. It is not suitable for children.

Instructions for Installation and Usage

- **Installation:**
 1. **Attachment of Cumberbund:**
 - Locate the internal attachment points inside the plate bag.
 - Securely attach the cumberbund by threading it through the designated slots.
 2. **Back Panel Integration:**
 - Align the zippers on the rear plate bag with the compatible back panel.
 - Zip securely to ensure stability and support.

- **Usage:**

- **Fitting Plates:**
- Ensure that the plates fit within the specified dimensions:
 - Medium: 10" x 12.5"
 - Large: 10.25" x 13.25"
 - Extra Large: 11" x 14.00"
 - Thickness: Maximum of 1.20"
- Insert the plates into the designated compartments of the rear plate bag.
- **Cable Routing:**
- Route communication cables through the open shoulder design for easy access.
- Ensure cables are secured and do not interfere with mobility.
- **Cleaning:**
- Rinse the bag with fresh water after use in saltwater environments.
- Allow the bag to air dry completely before storage.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- Do not incinerate the bag or its components, as they may release harmful substances.
- If the product is no longer usable, consider recycling materials where possible.

Contact Information for Further Support

For any questions or concerns regarding the safety and use of the OTB OVERT Rear Plate Bag, please refer to the contact information provided by your retailer.
