

# OTB OVERT REAR PLATE BAG - OTB LV-119 REAR OVERT PLATE BAG (X-LARGE) - MULTICAM

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such as sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our tubes cummerbund. Plate Fitment The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x 13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

## Attributes

- Name: [OTB LV-119 REAR OVERT PLATE BAG \(X-LARGE\) - MULTICAM](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101962
- Mfr. No.: PC-RB-MC-XL
- Color: Multi-Cam
- Delivery weight: 0.252kg
- Shipping height: 25mm
- Shipping width: 343mm
- Shipping length: 279mm

# OTB OVERT Rear Plate Bag Safety Instructions

## Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag. This product is designed to provide enhanced load carriage and soldier survival during seaborne operations. To ensure safe and effective use, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Always inspect the product before use for any signs of damage or wear.
- Ensure that the bag is used only for its intended purpose as described in the product manual.
- Keep the product away from fire, extreme heat, or sharp objects that may cause damage.
- Ensure that the bag is properly fitted and adjusted to your body to prevent injury during use.
- Be aware of your surroundings when using the product, especially in operational environments.

## Specific Safety Precautions for Use

- **Hydrophobic Material:** The bag is made from hydrophobic mesh material. While this allows for quick drainage, be cautious of the environment you are operating in to avoid exposure to hazardous substances.
- **Recovery Handle™:** The Recovery Handle™ is intended for use in emergency situations. Ensure that it is securely integrated before use. Note: The Recovery Handle™ is NOT included with this product.
- **Communications Cable Routing:** When routing communication cables, ensure they are secured and do not interfere with your movement or visibility.
- **Cummerbund Attachment:** The cummerbund attachment system is proprietary. Ensure that it is properly attached to avoid detachment during use.
- **Plate Fitment:** This bag is designed to fit United States Standard Issue SAPI cut plates. Ensure that the plates used fit within the specified dimensions to avoid compromised safety.

## Instructions for Installation and Usage

### 1. Fitting the Plate Bag:

- Ensure that the plate bag is compatible with the plates you intend to use.
- Insert the plates into the designated compartments of the bag, ensuring they are securely positioned.

### 2. Adjusting the Cummerbund:

- Attach the cummerbund inside the plate bag.
- Adjust the cummerbund for a snug fit, ensuring it does not restrict movement or breathing.
- Avoid external mounting that can snag or rip off during operations.

### 3. Routing Communication Cables:

- Route communication cables through the open shoulders of the bag.
- Ensure cables are secured and do not obstruct movement.

### 4. Using the Recovery Handle™:

- In case of an emergency, utilize the Recovery Handle™ for assistance.
- Ensure that it is fully integrated before use.

### 5. Cleaning and Maintenance:

- Rinse the bag with fresh water after use in salt or contaminated environments.
- Allow the bag to dry completely before storage.

## Disposal Instructions

- Dispose of the product in accordance with local regulations and guidelines.
- Do not dispose of the product in regular household waste if it contains hazardous materials.
- Consider recycling options for materials where applicable.

## Contact Information for Further Support

For any safety inquiries or further support, please refer to the contact information provided with the product packaging or visit the manufacturer's website.

Thank you for prioritizing safety and proper usage of the OTB OVERT Rear Plate Bag. Your adherence to these guidelines ensures not only your safety but also the effectiveness of the equipment during operations.
