

COMPACT SECTIONAL ROD - FORWARD CONTROLS DESIGN

COMPACT SECTIONAL RODS FOR AR15/M16, 14.5-16 CONFIGURATION

[Gun Cleaning & Chemicals](#) > [Cleaning Rods & Accessories](#) > [Cleaning Rods](#)

CSR (Compact Sectional Rods) was originally conceived to be a short and compact sectional rods for dislodging stuck cases in the chamber when mortaring the AR15/M16 fails. The USGI cleaning rods are almost perfect for the job, except they're quite long. Forward Controls Design wanted shorter rods that can be carried in packs more easily. CSR can also be used as a cleaning rod with the provided brass jag, it is not its primary function, however. CSR is a kit consists of precision machined 17-4 stainless steel, short (4.8" max length) rods with bead blasted matte finish, also included are a machined brass jag, and 17-4 stainless steel plug/ram. CSR is based on the old M16 cleaning rods, they have done away with the folding T handle to reduce bulk when stowed. CSR has the following components: a handle (4.55"), standard length rods (4.8"), short rods (3.95"), a jag for cleaning patches, and a serrated plug for clearing stuck cases. Though designed so it can be stored inside Vltor and SOPMOD stocks storage compartments (10.5 - 12.5, and 14.5 - 16 kits only, 18 - 20 kit is too bulky), they don't believe in using the AR as a suit case or storage platform, and prefer to store their batteries and small spare parts, including the CSR, in the pack. CSR can be ordered with a hand made, custom pouch, it can also be stored in a pistol magazine pouch. In case CSR is carried in the stock, we provide with a 1" elastic nylon band that keeps the rods together and from rattling inside the stock's storage compartment. CSR is available in the following configurations: 10.5 - 12.5: 1 handle, 1 standard length rod, 2 short rods, 1 ram plug and 1 jag. 14.5 - 16: 1 handle, 3 standard length rods, 1 short rods, 1 ram plug and 1 jag. 18 - 20: 1 handle, 3 standard length rods, 2 short rods, 1 ram plug and 1 jag. NOTE CSR is incompatible with USGI cleaning rods attachments (chamber brush, jag, and bore brush), as it is threaded for 8-32, we will have a 8-32 to 8-36 adapter that allows the use of USGI cleaning rods attachments.

Attributes

- Name: [FORWARD CONTROLS DESIGN COMPACT SECTIONAL RODS FOR AR15/M16, 14.5-16 CONFIGURATION](#)
- Manufacturer: [FORWARD CONTROLS DESIGN](#)
- Product no.: 430103551
- Mfr. No.: CSR 14.5-16
- Delivery weight: 1.497kg
- Shipping height: 13mm
- Shipping width: 102mm
- Shipping length: 165mm
- UPC: 687408648517

Safety Instruction Guide for COMPACT SECTIONAL ROD FORWARD CONTROLS DESIGN

Introduction

Thank you for choosing the COMPACT SECTIONAL ROD FORWARD CONTROLS DESIGN (CSR). This guide provides essential safety information to ensure the safe and effective use of your CSR product. Please read this guide carefully before use.

General Safety Guidelines

- Always handle the CSR with care. Improper use may lead to injury or damage.
- Keep the CSR out of reach of children. It is not a toy and may pose a choking hazard.
- Inspect the CSR before each use. Ensure that there are no visible defects or damage.
- Store the CSR in a cool, dry place when not in use to prevent corrosion or damage.
- Follow all local laws and regulations regarding the use of cleaning tools for firearms.

Specific Safety Precautions for Use

- **Use Only as Intended:** The CSR is designed for dislodging stuck cases and cleaning firearms. Do not use it for any other purpose.
- **Avoid Overexertion:** When using the CSR, apply only the necessary force to avoid injury or damage to the firearm.
- **Wear Protective Gear:** Consider wearing safety glasses and gloves to protect yourself from debris or accidental slips.
- **Be Aware of Your Surroundings:** Ensure that you are in a safe environment when using the CSR, away from people and pets.
- **Follow Firearm Safety Rules:** Always treat firearms as if they are loaded and follow standard safety protocols.

Instructions for Installation and Usage

1. Preparation:

- Ensure your firearm is unloaded and pointed in a safe direction.
- Gather all components of the CSR kit: handle, rods, jag, and plug.

2. Assembly:

- Attach the desired length of rod to the handle by threading it securely.
- If necessary, attach the brass jag to the end of the rod for cleaning.

3. Usage:

- Insert the rod into the chamber of the firearm gently.
- If dislodging a stuck case, apply a steady and controlled force.
- For cleaning, use the jag to push cleaning patches through the barrel.

4. Disassembly:

- Once finished, carefully unscrew the rod from the handle.
- Clean the CSR components as needed and store them properly.

Disposal Instructions

- Dispose of the CSR in accordance with local regulations.
- Do not throw the CSR in regular household waste if it is damaged or no longer usable.
- Consider recycling options for metal components where available.

Contact Information for Further Support

For any safety inquiries or concerns regarding the CSR, please refer to the product packaging or manufacturer's website for additional information.

By following these guidelines, you can ensure the safe and effective use of the COMPACT SECTIONAL ROD FORWARD CONTROLS DESIGN. Thank you for your attention to safety.
