

AXON SWITCH - UNITY TACTICAL AXON SWITCH FOR SUREFIRE/NGAL LASER SYNC 7" BLACK

[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Accessories](#)

The pinnacle of remote switch design for weapon-mounted accessories, AXON™ provides complete control of lights and lasers in a single, compact and rugged housing. AXON™ is the direct result of operational feedback from professional end-users on our industry leading switch technology. Lights and lasers can be fired from individual buttons with versions available for popular issued devices. Standard AXON™ models feature each button firing devices independently. SYNC models fire the laser independently, while the light button will fire both light and laser simultaneously. NGAL variants operate in a SYNC capacity, but offer a visible override feature for light and laser. Standard configuration is 7" cable length. AXON™ mounts directly to M1913 Rail or M-LOK® (with optional M-LOK® Mounting Kit). Its unique design provides tactile differentiation between the two buttons to eliminate confusion in dark, cold and high-stress situations. The light (angled) button features a switch that allows for both momentary and constant activation, while the laser button features a momentary-only button that supports the laser's double-click-for constant feature. SPECS MATERIAL - IMPACT RESISTANT POLYMER
COMPATIBILITY - SUREFIRE®, NATO CRANE-SPEC PORT, NGAL (LA-23/PEQ)

AXON SWITCH UNITY TACTICAL Safety Instruction Guide

Introduction

Thank you for choosing the AXON SWITCH UNITY TACTICAL. This guide provides essential safety instructions to ensure the safe and effective use of your product. Please read this document carefully before installation and use.

General Safety Guidelines

- Ensure safe use of the AXON SWITCH by following all instructions provided in this guide.
- Be aware of potential risks associated with weaponmounted accessories, including accidental activation and improper installation.
- Regularly check for updates or recalls related to the AXON SWITCH on the EU's Safety Gate platform.
- If you notice any defects or experience any issues with the product, report them to the appropriate authorities.

Specific Safety Precautions for Use

- Always handle the AXON SWITCH with care to avoid damage.
- Do not expose the AXON SWITCH to extreme temperatures or harsh environmental conditions.
- Ensure that the product is compatible with your weapon and any other accessories before use.
- Keep the product out of reach of children and vulnerable individuals.
- Use the AXON SWITCH only for its intended purpose as specified in this guide.

Instructions for Installation and Usage

1. Installation:

- Mount the AXON SWITCH directly to the M1913 Rail or MLOK® using the optional MLOK® Mounting Kit.
- Ensure that the switch is securely attached to prevent accidental detachment during use.
- Confirm that the cable length is appropriate for your setup (standard configuration is 7").

2. Usage:

- Familiarize yourself with the button layout before using the AXON SWITCH in a highstress situation.
- The angled button is designated for light activation and can be used for both momentary and constant activation.
- The laser button is designed for momentary activation only and supports the doubleclick feature for constant activation.
- For SYNC models, the laser can be activated independently, while the light button will activate both light and laser simultaneously.

Disposal Instructions

- Dispose of the AXON SWITCH in accordance with local regulations for electronic waste.
- Do not dispose of the product in regular household waste.
- Consider recycling options where available to minimize environmental impact.

Contact Information for Further Support

For any safety inquiries or additional support regarding the AXON SWITCH, please refer to the manufacturer's website or contact your local distributor.

By following these safety guidelines, you can ensure a safer experience with your AXON SWITCH UNITY TACTICAL. Thank you for your attention to these important instructions.
