## REAR OVERT PLATE BAG (LARGE) - BLACK

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate comms cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

# Safety Instruction Guide for OTB OVERT Rear Plate Bag

## Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag by Spiritus Systems. This product is designed to enhance your load carriage capabilities during various operations, including seaborne activities. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

## General Safety Guidelines

- Ensure that the product is used according to the manufacturer's instructions to prevent accidents or injuries.
- Regularly inspect the bag for any signs of wear or damage. Do not use if damaged.
- Store the bag in a cool, dry place away from direct sunlight to prevent material degradation.
- Keep the product out of reach of children and vulnerable individuals to avoid accidental use.
- Report any unsafe conditions or incidents to the relevant authorities.

## Specific Safety Precautions for Use

- **Water Safety:** The product is designed for seaborne operations. Ensure that you are familiar with water safety protocols before use.
- **Weight Limits:** Do not exceed the maximum weight capacity of the bag. Overloading may compromise safety.
- **Attachment Systems:** Ensure that all attachments (such as cummerbunds and shoulder covers) are securely fastened before use.
- **Cable Management:** When routing communication cables, ensure they are not pinched or damaged, which can lead to malfunction.
- **Environmental Conditions:** Be aware of your surroundings and avoid using the product in extreme weather conditions that may affect performance.

## Instructions for Installation and Usage

### 1. Fitting the Plate:

- Ensure that the plate fits within the specified dimensions:
  - Medium: 10" x 12.5"
  - Large: 10.25" x 13.25"
  - Extra Large: 11" x 14.00"
  - Thickness: Maximum of 1.20"
- Insert the plate into the designated compartment of the rear plate bag.

### 2. Attaching the Cummerbund:

- Locate the internal attachment points for the cummerbund within the plate bag.
- Securely attach the cummerbund, ensuring it is properly adjusted for a snug fit.

### 3. Integrating Accessories:

- Use the MOLLE webbing to attach any additional accessories or pouches as needed.
- Ensure that all accessories are securely fastened and do not obstruct movement.

### 4. Cable Routing:

- Route communication cables through the designated channels to avoid tangling.
- Ensure that cables are not pinched when wearing the bag.

#### **5. Cleaning and Maintenance:**

- After use, rinse the bag with fresh water to remove salt and debris.
- Allow the bag to air dry completely before storing it.

## **Disposal Instructions**

- Dispose of the product in accordance with local regulations regarding textile and plastic waste.
- Do not burn the product as it may release harmful substances.
- If the product is damaged beyond repair, consider recycling the materials where possible.
