

# OTB OVERT REAR PLATE BAG - SPIRITUS SYSTEMS OTB LV-119

## REAR OVERT PLATE BAG (LARGE) - COYOTE BROWN

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such as sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our tubes cummerbund. Plate Fitment The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x 13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

## Attributes

- Name: [SPIRITUS SYSTEMS OTB LV-119 REAR OVERT PLATE BAG \(LARGE\) - COYOTE BROWN](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430104662
- Mfr. No.: PC-RB-CB-LG
- Colour: Coyote Brown
- Delivery weight: 0.23kg
- Shipping height: 25mm
- Shipping width: 279mm
- Shipping length: 178mm

# Safety Instruction Guide for OTB OVERT Rear Plate Bag

## Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag by Spiritus Systems. This product is designed to enhance your operational capabilities while ensuring safety and comfort during use. Please read this safety instruction guide carefully to understand how to use, install, and dispose of your product safely.

## General Safety Guidelines

- Ensure the product is suitable for your intended use and environment.
- Regularly inspect the bag for any signs of wear or damage before each use.
- Do not exceed the specified load capacity of the bag to avoid compromising safety.
- Keep the product away from extreme temperatures, moisture, and direct sunlight to prolong its lifespan.
- Always follow the manufacturer's recommendations for care and maintenance.

## Specific Safety Precautions for Use

- **Hydrophobic Material:** The bag is made from a hydrophobic mesh material. While it is designed to resist water, avoid prolonged exposure to water to maintain its integrity.
- **Recovery Handle™:** The Recovery Handle™ is integrated into the design for ease of use; however, it is not included with the product. Use it only as intended.
- **Cummerbund Attachment:** Ensure that the cummerbund is securely attached to prevent accidental detachment during use.
- **Cable Routing:** When routing communication cables, ensure they do not interfere with movement or operational tasks.
- **Weight Distribution:** Distribute weight evenly in the bag to maintain balance and prevent injury.

## Instructions for Installation and Usage

### Installation

#### 1. Cummerbund Attachment:

- Locate the internal attachment points inside the plate bag.
- Secure the cummerbund by threading it through the attachment points, ensuring it is tight but comfortable.

#### 2. Back Panel Integration:

- Align the zippers on the rear plate bag with the corresponding zippers on the back panel.
- Zip securely to ensure a stable connection.

#### 3. Plate Fitment:

- Ensure you are using plates that fit within the following dimensions:
  - Medium: 10" x 12.5"
  - Large: 10.25" x 13.25"
  - Extra Large: 11" x 14.00"
  - Thickness: MAXIMUM of 1.20"
- Insert the plates into the designated compartments, ensuring they are secure.

## Usage

- **Wearing the Bag:**

- Adjust the shoulder straps for a comfortable fit.
- Ensure that the bag sits securely on your torso without shifting.
- Utilize the open shoulder design for easy access to communication devices.

- **Load Management:**

- Load the bag according to the weight limits and ensure that items are evenly distributed.
- Regularly check the integrity of the bag and its attachments during use.

## Disposal Instructions

- Dispose of the OTB OVERT Rear Plate Bag in accordance with local regulations.
- If the bag is damaged beyond repair, consider recycling materials where applicable.
- Do not incinerate the product, as it may release harmful substances.

## Contact Information for Further Support

For any safety inquiries or product support, please refer to the manufacturer's website or customer service resources. It is important to stay informed about any recalls or safety updates related to your product.

## Conclusion

By following these guidelines, you can ensure a safe and effective experience with your OTB OVERT Rear Plate Bag. Always prioritize safety and stay informed about best practices for equipment use. Thank you for choosing Spiritus Systems.
