

OTB OVERT REAR PLATE BAG - SPIRITUS SYSTEMS OTB LV-119

REAR OVERT PLATE BAG (MEDIUM) - RANGER GREEN

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate comms cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our tubes cummerbund. Plate Fitment The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x 13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

OTB OVERT Rear Plate Bag Safety Instructions

Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag by Spiritus Systems. This product is designed for use in various environments, including seaborne operations. Please read this safety instruction guide carefully to ensure the safe use and maintenance of your product.

General Safety Guidelines

- **Product Safety:** Ensure safe use of this product by following all instructions. This product is designed for nonfood use and complies with EU safety regulations.
- **Enhanced Recalls:** Stay informed about product recalls. If a recall occurs, you will be notified through standardized notices and provided with remedies at no cost.
- **Online Shopping:** When purchasing online, ensure that the platform adheres to safety requirements equivalent to physical stores.
- **Special Consumer Focus:** Extra care should be taken when this product is used by or around vulnerable groups, such as children.
- **EU Contact Point:** For any safety inquiries, please refer to the EU-based contact provided with your product.
- **Rapid Alerts:** Be aware that updates on unsafe products can be found through the EU's Safety Gate system.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - Avoid using the product in conditions that exceed its specifications.
 - Be cautious of sharp edges when handling the bag and its components.
- **Avoiding Hazards:**
 - Ensure that all components are securely attached before use.
 - Do not overload the bag beyond its intended capacity.
- **Age-Specific Warnings:**
 - This product is intended for adult users. Keep out of reach of children to prevent accidental use or injury.

Instructions for Installation and Usage

- **Installation:**
 - Ensure the rear plate bag is compatible with your existing vest system.
 - Attach the cummerbund inside the plate bag for a secure fit.
 - Use the zippers for integration with back panels as specified in the product manual.
- **Usage:**
 - Adjust the cummerbund for a snug fit without compromising comfort.
 - Route communication cables through the designated openings to avoid snagging.
 - Regularly check for wear and tear, especially on the mesh material and attachment points.

Disposal Instructions

- Dispose of the product responsibly.
- If the product is no longer usable, follow local regulations for disposal of textile and plastic materials.
- Do not incinerate the product as it may release harmful substances.

Contact Information for Further Support

For any additional questions or concerns regarding the OTB OVERT Rear Plate Bag, please refer to the contact information provided with your product packaging. It is important to keep this guide for future reference.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our priority.
