

OTB OVERT REAR PLATE BAG - SPIRITUS SYSTEMS OTB LV-119 REAR OVERT PLATE BAG (X-LARGE) - RANGER GREEN

[Home](#)

OTB OVERT Rear Plate Bag The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The LV/119 O V E R T OTB Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments including seaborne operations. The O V E R T OTB shares the same profile as the O V E R T and C O V E R T plate bags, while possessing additional features that make it more suitable for operations in the water. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features more MOLLE webbing than the standard O V E R T, which aids in the integration of Personal Floatation Devices (PFD's). The rear bag also features zippers that will integrate into our back panels in the future. Recovery Handle™ Integration Full integration of our Recovery Handle™. NOTE: The Recovery Handle™ is NOT included with this product. Back Panel Support The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T offers open shoulders to facilitate comms cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment method on the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth

seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our tubes cummerbund. Plate Fitment The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x 13.25" Extra Large- 11" x 14.00" Thickness - MAXIMUM of 1.20" NOTE: This is a component of a Spiritus Systems LV/119 Plate Carrier build. To build a COMPLETE plate carrier you will need to select AT LEAST ONE of each of these items: Spiritus Systems Front Plate Bag Spiritus Systems Rear Plate Bag Spiritus Systems Shoulder Covers Spiritus Systems Cummerbund Set

Attributes

- Name: [SPIRITUS SYSTEMS OTB LV-119 REAR OVERT PLATE BAG \(X-LARGE\) - RANGER GREEN](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430104669
- Mfr. No.: PC-RB-RG-XL
- Colour: Ranger Green
- Delivery weight: 0.252kg
- Shipping height: 25mm
- Shipping width: 343mm
- Shipping length: 279mm

OTB OVERT Rear Plate Bag Safety Instruction Guide

Introduction

Thank you for choosing the OTB OVERT Rear Plate Bag by Spiritus Systems. This guide provides essential safety instructions and general guidelines to ensure the safe use and maintenance of your product. Please read this document carefully before using the bag.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Regularly inspect the bag for signs of wear, damage, or malfunction.
- Do not exceed the maximum weight capacity of the bag.
- Keep the bag away from sharp objects and extreme heat sources.
- Ensure that all straps and attachments are securely fastened before use.
- Follow all local laws and regulations regarding the use of tactical gear.

Specific Safety Precautions for Use

- **Hydrophobic Material:** The bag is made from hydrophobic mesh material designed for seaborne operations. Ensure that the bag is fully dried after exposure to water to prevent mold and mildew.
- **Recovery Handle™:** The Recovery Handle™ is not included with the product but is designed for integration. Do not use the handle for lifting or pulling unless it is properly attached.
- **Cummerbund System:** The cummerbund attachment is proprietary. Ensure it is securely attached before use to prevent accidental detachment.
- **Communications Cable Routing:** Ensure that all cables are routed safely to avoid snagging during movement.
- **Plate Fitment:** Ensure that the plates used comply with the specified dimensions to avoid improper fitment:
 - Medium 10" x 12.5"
 - Large 10.25" x 13.25"
 - Extra Large 11" x 14.00"
 - Thickness MAXIMUM of 1.20"

Instructions for Installation and Usage

1. Fitting the Plates:

- Open the rear compartment of the plate bag.
- Insert the appropriate size plate ensuring it fits securely within the designated area.
- Close the compartment securely.

2. Attaching the Cummerbund:

- Locate the internal attachment points inside the plate bag.
- Align the cummerbund with the attachment points and secure it firmly.
- Adjust the cummerbund for a comfortable fit.

3. Routing Communication Cables:

- Identify the routing channels provided in the bag.
- Carefully thread the communication cables through the designated channels, ensuring they are not

pinched or damaged.

4. Using the Recovery Handle™ :

- If you have the Recovery Handle™, ensure it is properly integrated into the rear plate bag.
- Test the handle before use to ensure it is secure.

5. Cleaning and Maintenance:

- Rinse the bag with fresh water after exposure to saltwater or debris.
- Allow the bag to air dry completely before storage.
- Do not use harsh chemicals or detergents for cleaning.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- If the product is damaged beyond repair, ensure it is disposed of safely to prevent environmental harm.
- Recycle materials where possible.

Contact Information for Further Support

For any inquiries or concerns regarding the OTB OVERT Rear Plate Bag, please refer to the official Spiritus Systems website or contact your local distributor.

By following these guidelines, you can ensure safe and effective use of your OTB OVERT Rear Plate Bag. Thank you for your attention to these safety instructions.
