

MICRO FIGHT CHASSIS - SPIRITUS SYSTEMS MICRO FIGHT CHASSIS MK5 WOODLAND

[Shooting Accessories](#) > [Tactical Gear](#) > [Chest Rigs](#)

The Micro Fight Chassis MkV is a small and lightweight chassis that can be used as either a standalone magazine placard on a plate carrier, or the central hub for a chest rig when other Spiritus Systems components are used. The MkV is a single cell placard-style chassis that is built with all-new materials and manufacturing processes. The design features MOLLE on the front and sides to accommodate additional magazine pouches. Tourniquets and other equipment can also be stowed outboard with our universal retention kit, and a row of anchor points along the top opening will interface with our magazine bungee retention kit to secure any caliber of weapon. The main cell of the MkV Chassis is lined with loop Velcro on both sides and will accommodate all of Spiritus Systems' magazine inserts. Versatile and Scalable The Micro Fight Chest Rig MkV will interface with the whole line of Spiritus Systems chest rig and plate carrier components. The footprint of the MkV is identical to the Mk4 and will seamlessly connect with Expander Wings, LV/119 plate bags, and the Thing 1 and Thing 2. The MkV is extremely capable as a low-bulk solution for environments where space and weight command a premium. However, the product's modularity and compatibility with all Spiritus Accessories allow the micro fight to scale from a minimalistic magazine carrier to a full-fledged plate carrier system, or various sustainment and comms-focused chest rigs. The CCS Pouch The MkV can be combined with its companion product, the CCS Pouch. The CCS pouch is a full-featured GP Pouch that vastly improves upon the legacy front cell's functionality, and storage capacity. For those that do not need a GP Pouch solution, the MkV's MOLLE front will accept any 3rd party magazine holders or other pouches

Specific Safety Precautions for Use

- **Age Restriction:** The MICRO FIGHT CHASSIS MK5 is intended for adult users. It should not be used by children or individuals who may not understand its operation.
- **Proper Usage:** Ensure that the chassis is attached securely to your plate carrier or chest rig before use. Failure to do so may result in accidental detachment and loss of equipment.
- **Weight Limit:** Do not exceed the recommended weight limit for the chassis. Overloading the chassis may compromise its structural integrity and lead to failure.
- **Environmental Considerations:** Avoid using the chassis in extreme weather conditions unless it is specifically designed for such environments.
- **Inspection:** Regularly inspect the chassis for wear and tear. Replace any damaged components immediately to ensure safety and functionality.

Instructions for Installation and Usage

1. Installation:

- Start by ensuring that the plate carrier or chest rig is clean and free from debris.
- Align the MICRO FIGHT CHASSIS MK5 with the attachment points on your plate carrier or chest rig.
- Securely attach the chassis using the MOLLE system, ensuring that all straps are fastened tightly.
- Verify that the chassis is firmly in place and does not move when pulled.

2. Usage:

- Load magazines into the chassis, ensuring they are oriented correctly for easy access.
- Utilize the loop Velcro lining to secure any additional inserts that may be compatible with the chassis.
- Use the universal retention kit to stow tourniquets and other equipment as needed.
- When using the bungee retention kit, ensure that it is properly attached to the anchor points along

the top opening.

3. Maintenance:

- Clean the chassis with a damp cloth and mild soap as needed. Avoid using harsh chemicals that may damage the material.
- Store the chassis in a cool, dry place when not in use to prevent degradation of materials.

Disposal Instructions

- When the MICRO FIGHT CHASSIS MK5 is no longer needed, please dispose of it responsibly.
- Check local regulations regarding the disposal of textile products and follow any specific guidelines provided.
- If possible, recycle components that are made from recyclable materials to minimize environmental impact.
