Safety Instruction Guide for Forster SAAMI Rimless Headspace Gauges

Introduction

Thank you for choosing the Forster SAAMI Rimless Headspace Gauges. These precision instruments are designed to help gunsmiths and firearm enthusiasts accurately measure the headspace of rifle chambers. Proper headspace is essential for ensuring that firearms operate safely and reliably. This guide provides important safety instructions and guidelines to ensure safe use of the product.

General Safety Guidelines

- Ensure that the gauges are used only for their intended purpose, which is to measure headspace in rifle chambers.
- Always handle the gauges with care to avoid damage.
- Keep the gauges away from children and unauthorized users.
- Regularly inspect the gauges for any signs of wear or damage before use.
- Store the gauges in a safe, dry place when not in use to prevent corrosion and damage.
- Follow all relevant firearm safety rules and regulations while using the gauges.

Specific Safety Precautions for Use

- **Precision Engineering:** Ensure that the gauge is machined to exacting SAAMI specifications for accurate measurements.
- **Gauge Types:**
 - **Go Gauge:** Use this gauge to confirm the minimum chamber size. The firearm should chamber and fire a cartridge safely when this gauge is used.
 - **NoGo Gauge:** This gauge checks that the chamber does not exceed the maximum recommended headspace. The bolt should not close on this gauge.
 - **Field Gauge:** Use this gauge to determine the absolute maximum safe headspace. If the bolt closes on this gauge, the firearm is considered unsafe to shoot.
- **Durable Construction:** Handle the gauges carefully to maintain their integrity. Do not subject them to excessive force or impact.
- **Compatibility:** Ensure that you are using the correct gauge for your specific caliber. Refer to the specifications for compatibility.

Instructions for Installation and Usage

- **Preparation:**
 - Ensure that the firearm is unloaded and safe to work on.
 - Gather the necessary tools and workspace to perform the measurement.
- **Using the Gauges:**
 1. Select the appropriate gauge (Go, NoGo, or Field) based on your measurement needs.
 2. Insert the gauge into the chamber of the firearm.
 3. Check the fit:
 - For the Go Gauge, the bolt should close fully and smoothly.
 - For the NoGo Gauge, the bolt should not close.
 - For the Field Gauge, if the bolt closes, the firearm is unsafe to shoot.
 4. Remove the gauge carefully after measurement.
- **PostUse:**
 - Clean the gauges after use to remove any debris or contaminants.
 - Store the gauges in their designated case or storage area.

Disposal Instructions

- Dispose of the gauges responsibly when they are no longer in use or if they are damaged beyond repair.
