

MULTI FUNCTION END PLATE AND ANTI-ROTATION CASTLE NUT - STRIKE INDUSTRIES MULTI-FUNCTION END PLATE W/ANTI- ROTATION CASTLE NUT BLACK

[Rifle Parts](#) > [Receiver Parts](#) > [Buffer Tube Parts](#) > [Buffer Tube Hardware](#)

The Strike Industries Multi-Function End Plate and Anti-Rotation Castle Nut are designed to update and upgrade the often neglected castle nut and endplate system. While the traditional endplate and castle nut works extremely well in retaining your receiver extension, the peening of the castle nut is not conducive to rebuilding. With the vast amount of aftermarket support for the AR system today, we felt that there's a need for a secure system as adaptive as you are. Enter the MFEP and ACN. The MFEP and ACN offer an anti-rotate QD socket or sling loops built in. The Anti-Rotation Castle Nut is specifically designed to work with this end plate. Instead of peening the endplate to secure the castle nut, a set screw fulfills this function to allow for multiple uses as you upgrade, or update your build. The Multi-Function End Plate is reversible, and has three integral sling mounting options. A traditional sling loop, a loop for hook style attachments, and a QD socket gives you the flexibility in using whichever attachment you prefer. Package Contents: 1x Multi Function Endplate 1x Anti-Rotation Castle Nut 1x Detent Set Screw (1.5MM HEX not included) 1x Anti-Rotation Set Screw (1.5MM HEX not included) 1x Warning card Product Features: Set screw to retain takedown pin and detent for ease of installation No peening or staking needed with the Anti-Rotation Castle Nut/End Plate design Anti-rotate QD socket Multiple sling attachment points Torque: Do not exceed 35 ft/lbs (47.45 nM) for the castle nut WARNING: Before every use, always check proper function of your QD mount and/or sling loop and any wear and tear from use Always have your weapon in the SAFE position when not being fired Always follow all firearms safety rules and never point your weapon at anything you are not willing to destroy -CALIFORNIA PROPOSITION 65 WARNING:- WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Safety Instruction Guide for the Strike Industries MultiFunction End Plate and AntiRotation Castle Nut

Introduction

Thank you for choosing the Strike Industries MultiFunction End Plate and AntiRotation Castle Nut. This product is designed to enhance the functionality and safety of your firearm. Please read this safety instruction guide carefully to ensure proper use and maintenance.

General Safety Guidelines

- Ensure that the product is used in accordance with all applicable laws and regulations.
- Always handle firearms safely and responsibly.
- Keep this product out of reach of children and unauthorized users.
- Regularly inspect the product for wear and damage before each use.
- Report any unsafe products or accidents to the relevant authorities.
- Stay informed about recalls and safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Always check the proper function of your QD mount and/or sling loop before use.
- Do not exceed the torque specification of 35 ft/lbs (47.45 nM) for the castle nut.
- Ensure your weapon is in the SAFE position when not in use.
- Never point your weapon at anything you are not willing to destroy.
- Be aware that this product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov.

Instructions for Installation and Usage

1. Preparation:

- Ensure your firearm is unloaded and in a safe position.
- Gather all necessary tools, including a 1.5MM HEX wrench (not included).

2. Installation of the MultiFunction End Plate:

- Align the end plate with the receiver extension.
- Secure the end plate using the provided set screw to retain the takedown pin and detent.
- Ensure that the end plate is properly seated and secure.

3. Installation of the AntiRotation Castle Nut:

- Place the AntiRotation Castle Nut onto the receiver extension.
- Tighten the castle nut using the appropriate torque specifications (do not exceed 35 ft/lbs).
- Check that the set screw is securely fastened to prevent rotation.

4. Using the Sling Attachment Points:

- Choose your preferred sling attachment method (traditional sling loop, hook style loop, or QD socket).
- Attach your sling according to the manufacturer's instructions for the sling.

5. **PostInstallation Check:**

- Inspect the installation to ensure all components are secure and functioning as intended.
- Test the QD mount and/or sling loop for proper operation.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding electronic and hazardous waste.
- Do not dispose of the product in regular household waste.
- Contact local waste management authorities for guidance on proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the use and safety of this product, please refer to the manufacturer's website or contact their support team. Ensure you have the product details ready for a more efficient response.

Thank you for your attention to these safety instructions. Your safety is our priority.
