

# MASS DRIVER COMP - STRIKE INDUSTRIES G3 MASS DRIVER COMP - COMPACT (GLOCK 19)

[Handgun Parts](#) > [Barrel Parts](#) > [Muzzle Devices](#) > [Compensators](#)

The Strike Industries Mass Driver Compensator (MDC) represents a quantum leap in compensator design. Current designs have largely been unchanged since the 1930s. It's about time for something revolutionary. The Mass Driver name is inspired by the idea of theoretical mass driver engines in space travel. By ejecting mass, an equal and opposite reaction is generated propelling the space vehicle forward. The Mass Driver Compensator is driven by the hot gasses expelled through the barrel after the round is discharged, and acts as a counter balance system to attenuate mechanical recoil. Barrel mounted compensators add reciprocating mass and increase the moment of inertia to the operating system, which can have a negative effect on reliable cycling of recoil operated handguns. By separating the compensator from the operating components after ignition, the MDC allows for close to stock cyclic speeds, and reduces reciprocating mass. The compensator of the MDC system has a widened bore to reduce baffle strikes and keyholing rounds along with a 2.5mm relief cut at the top of the rear to reduce "lipping" and damage to the face of the pistol slide. NOTE: Recommended torque value for guide rod nut is 25 lbs/in. Use with +P and +P+ 9mm ammo will produce premature internal spring wear and cause failure Package Contents: x1 Comp main body x1 Recoil spring x1 Guide rod x1 Guide rod fitment washer x1 Guide rod head x1 Internal spring x1 Warning card Product Features: No threaded barrel needed (but can be used) Eliminates the need for threaded barrels. 50 State Legal Widened bore to reduce baffle strikes and keyholing rounds 2.5mm relief cut at the top rear of comp to reduce "lipping" and damage to the face of the slide No permanent modification of weapon required Blended, no snag profile Matches with width of the slide, it can be used with open holsters, no special holster needed Counter recoil design, as the slide moves back the comp moves forward to reduce felt recoil Contours with slide dimensions to be compatible with most open-bottom holsters Precision CNC machined Threaded Barrels: Strike industries recommend use with non-threaded barrels if possible but yes, the Mass Driver Comp is compatible with most GLOCK™ aftermarket threaded barrels. They tested with majority of the popular brands on the market such as: AlphaWolf, Battle Arms Development, Bear Creek Arsenal, Brownells, CMC Triggers, Faxon Firearms, Fortis Manufacturing, Grey Ghost Precision, Killer Innovations, LANTAC, Lone Wolf Distributors, Next Level Armament, Shadow Systems, Suarez International, Tactical Kinetics, ZEV Technologies. NOTES: Designed for and tested on OEM GLOCK™ factory and Strike Industries slides SI cannot guarantee proper fitment and application on third party slides and frames Recommended torque value for guide rod nut is 25 lbs/in. Use with +P and +P+ 9mm ammo will produce premature internal spring wear and cause failure Loctite® Threadlocker Blue 242® on all threads Gunsmith or armorer installation recommended Product tested with factory GLOCK™ components Performance may vary when using third party compatible GLOCK™ components Consult with a local gunsmith for any custom modification while use with this product COMPATIBILITY: For GLOCK™ GEN3 OR GEN5 G19 (compact) & G17 (standard) SLIDES Holsters: SI Mass Driver Comp sits flush with OEM GLOCK™ slides and can be used in most open-ended holsters that accommodate compensators DISCLAIMER: -This product is not manufactured, authorized, endorsed, or warranted by GLOCK. ## Attributes

- Name: [STRIKE INDUSTRIES G3 MASS DRIVER COMP - COMPACT \(GLOCK 19\)](#)
- Manufacturer: [STRIKE INDUSTRIES](#)
- Product no.: 430105329
- Mfr. No.: SI-G3-MDCOMP-C
- Model: 19,Gen 3
- Weapon type: Glock
- Delivery weight: 0.184kg
- Shipping height: 51mm
- Shipping width: 51mm
- Shipping length: 178mm
- UPC: 708747548051

# Safety Instruction Guide for the Strike Industries Mass Driver Compensator (MDC)

## Introduction

Thank you for choosing the Strike Industries Mass Driver Compensator (MDC) designed for use with GLOCK 19 and other compatible models. This guide provides essential safety instructions and usage guidelines to ensure safe and effective operation of your compensator. Please read this guide thoroughly before installation and use.

## General Safety Guidelines

- Ensure that the product is used in accordance with all applicable laws and regulations.
- Do not use the compensator with firearms that have not been tested for compatibility.
- Always handle firearms with care and treat every firearm as if it is loaded.
- Keep the compensator and all firearms out of reach of children and unauthorized users.
- Regularly inspect the compensator for any signs of wear or damage.
- Report any unsafe products or accidents to the relevant authorities.

## Specific Safety Precautions for Use

- **Compatibility:** This product is designed for GLOCK GEN3 and GEN5 models, specifically the G19 (compact) and G17 (standard) slides. Ensure your firearm is compatible before use.
- **Installation:** Installation should be performed by a qualified gunsmith or armorer. Improper installation may lead to malfunction or injury.
- **Torque Specifications:** The recommended torque value for the guide rod nut is 25 lbs/in. Exceeding this value may cause damage to the compensator or firearm.
- **Ammunition:** Use of +P and +P+ 9mm ammunition may lead to premature internal spring wear and potential failure. Always use standard ammunition unless specified otherwise.
- **Inspection:** Regularly inspect the compensator for baffle strikes or keyholing rounds. Ensure the compensator is free of obstructions before use.
- **Warning Card:** Always refer to the included warning card for additional safety information.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Remove the existing guide rod and recoil spring from the firearm.
- Install the new guide rod and recoil spring provided with the MDC.
- Attach the MDC compensator to the barrel according to the manufacturer's instructions.
- Ensure all components are securely fastened and torqued to the recommended specifications.

### 2. Usage:

- After installation, conduct a function check to ensure proper operation.
- When firing, maintain a firm grip on the firearm to manage recoil effectively.
- Monitor performance during use; if you notice any unusual behavior, cease use immediately and consult a qualified gunsmith.

## Disposal Instructions

- Dispose of the compensator and any packaging materials in accordance with local regulations.
- Do not dispose of any firearm components in regular household waste.

- Contact your local waste management facility for guidance on proper disposal methods for firearm accessories.

## Contact Information for Further Support

For any inquiries related to safety, compatibility, or installation, please consult a qualified gunsmith or contact the manufacturer directly.

By adhering to these safety guidelines and instructions, you can ensure a safe and effective experience with the Strike Industries Mass Driver Compensator. Thank you for your attention to safety and responsible firearm use.
