

MICRO THREADED COMP CIRCLE - STRIKE INDUSTRIES MICRO THREADED BARREL COMPENSATOR-CIRCLE

[Handgun Parts](#) > [Barrel Parts](#) > [Muzzle Devices](#) > [Compensators](#)

The CIRCLE edition pistol compensator from the Strike Micro Threaded Comp (SMTC) line can work with just about any size slide using a threaded barrel with 1/2"x28 Threads Per Inch (TPI). This simple and sleek CIRCLE design is for those looking for a minimalist sized compensator that still redirects gas to mitigate felt recoil and reduce muzzle rise. SI internal testing has typically seen a reduction average range (dependent on application) of 8-15% in felt recoil. The included O-ring (with spares) is used to help time and retain the SMTC CIRCLE comp. Originally designed for smaller compact, sub-compact and micro sized pistols, the SI styling of the CIRCLE maintains fitment with your existing holster or majority of holsters on the market. On full size or any size pistols, consider it as also a thread protector with added muzzle control. Made from AISI 1144 steel bead blasted with Quench Polish Quench (QPQ) process finish, the Strike Micro Threaded Comp - CIRCLE is small and lightweight at only a total length of 16.3mm (0.64") while redirecting gas for recoil reduction to keep you on target. **WARNING:** Due to reduction of slide energy, recoil spring tuning might be required when using this compensator **WARNING:** For threaded barrels with no shoulder, the o-ring included with this compensator will not work and cannot be used to help with timing. Please use Loctite® Threadlocker Red to secure compensator to threaded barrel but apply an appropriate amount and not too much. Check this compensator as part of your routine maintenance. All installations must be done by a certified professional gunsmith only and properly tested to pass all safe and function tests. Package Contents: x1 Strike Micro Threaded Comp - CIRCLE x3 O-ring Product Features: Micro compensator that can work with just about any size slide using a threaded barrel (1/2"-28 TPI) O-ring used for timing and retaining compensator Minimalist design for fitment in most holsters on the market SI styling that is universal to almost all OEM and aftermarket slides on the market Designed to work with micro, sub-compact, compact and full size pistols Lightweight Made from AISI 1144 steel bead blasted with Quench Polish Quench (QPQ) process finish **COMPATIBILITY:** With any 1/2"x28 TPI threaded barrel Calibers: 9mm and .357 SIG -CALIFORNIA PROPOSITION 65 **WARNING:-** **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Safety Instruction Guide for the Strike Industries Micro Threaded Comp CIRCLE

Introduction

Thank you for choosing the Strike Industries Micro Threaded Comp CIRCLE. This product is designed to enhance your shooting experience by reducing felt recoil and muzzle rise. Please read this safety instruction guide carefully to ensure safe and effective use of the compensator.

General Safety Guidelines

- Ensure the product is used only with compatible threaded barrels (1/2"x28 TPI).
- Always handle firearms and accessories responsibly and in accordance with local laws.
- Keep the compensator and all firearm accessories out of reach of children and unauthorized users.
- Regularly inspect the compensator for signs of wear or damage before each use.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- **WARNING:** Due to the reduction of slide energy, recoil spring tuning may be required when using this compensator.
- **WARNING:** For threaded barrels without a shoulder, the included Oring will not function correctly for timing.
- Use Loctite® Threadlocker Red to secure the compensator to the threaded barrel, applying an appropriate amount—do not overapply.
- Check the compensator regularly as part of your routine maintenance to ensure safe operation.
- All installations must be performed by a certified professional gunsmith and adequately tested to pass all safety and function tests.

Instructions for Installation and Usage

1. Installation:

- Ensure that the firearm is unloaded and safe before beginning installation.
- Remove the existing muzzle device if applicable.
- Clean the threads on the barrel to ensure a secure fit.
- Apply a small amount of Loctite® Threadlocker Red to the threads of the compensator.
- Screw the compensator onto the threaded barrel, ensuring it is tight and secure.
- Use the included Oring to assist in timing and retaining the compensator in place.

2. Usage:

- Always verify that the compensator is securely attached before firing.
- Maintain a proper grip and stance while firing to effectively manage recoil.
- Monitor the performance of the compensator and firearm during use; stop using the compensator if any issues arise.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding metal waste and firearm accessories.
- Do not dispose of the product in regular household waste.
- Contact your local waste management authority for guidance on proper disposal methods.
