

MICRO THREADED BARREL COMP-QUAD - STRIKE INDUSTRIES

MICRO THREADED BARREL COMP-QUAD

[Handgun Parts](#) > [Barrel Parts](#) > [Muzzle Devices](#) > [Compensators](#)

The QUAD is a pistol compensator from the Strike Micro Threaded Comp (SMTC) line that can work with just about any size slide using a threaded barrel with 1/2"x28 Threads Per Inch (TPI). The wide front wall baffling redirects gas to mitigate felt recoil and reduce muzzle rise. SI internal testing has typically seen a reduction average range (dependent on application) of 15-30% in felt recoil. This QUAD version in the SMTC line has a built-in anti-rotation system using the front tip of the pistol guide rod for most applications other than pistols with a flush guide/recoil rod system. With the clamp style design on the SMTC QUAD, timing the comp is simple including a secure and tight fitment. Originally designed for smaller compact, sub-compact and micro sized pistols, the SI styling of this QUAD pairs aesthetically well with most OEM and aftermarket slides on the market including full size pistols. Made from S45C steel with HRC40-45 heat treatment and a black oxide finish, the Strike Micro Threaded Comp - QUAD offers a smaller threaded barrel compensator option for your pistol with SI style. Package Contents: x1 Strike Micro Threaded Comp - QUAD x1 Set screw [M4x12mm] x1 Torx tool [T20] x1 Waning card

Product Features: Micro compensator that can work with just about any size slide using threaded barrel (1/2"-28 TPI) Built-in anti-rotation system using front tip of guide rod (when applicable) Wide front wall baffling redirects gas to mitigate felt recoil and reduce muzzle rise Secure tight fitment with easy timing clamp style design SI styling which matches most OEM and aftermarket slides on the market Designed to work with micro, sub-compact, compact and full size pistols Made from S45C steel with HRC40-45 heat treatment and black oxide finish

COMPATIBILITY: With any 1/2"x28 TPI threaded barrel Calibers: 9mm and .357 SIG NOT COMPATIBLE: Built-in anti-rotation system may not work with pistols using flush guide/recoil rod systems

WARNING: Due to the reduction of slide energy, recoil spring tuning will be required when using this compensator Torque: Set screw to exactly 40 in/lbs (4.5 Nm) NOTE: Recommended to re-apply Loctite® Threadlocker Blue 243® anytime set screw is removed before reinstalling -CALIFORNIA PROPOSITION 65 WARNING:- WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Safety Instruction Guide for the MICRO THREADED BARREL COMPQUAD

Introduction

Thank you for choosing the MICRON THREADED BARREL COMPQUAD by Strike Industries. This guide provides essential safety instructions, installation tips, and usage guidelines to ensure your safety and the effective performance of the product. Please read this document carefully before use.

General Safety Guidelines

- Ensure that you are familiar with the operation of your firearm before using this compensator.
- Always follow local laws and regulations regarding firearm accessories and modifications.
- Use this product only with compatible firearms and threaded barrels (1/2"x28 TPI).
- Regularly inspect the compensator and firearm for signs of wear or damage before each use.
- Keep this product out of reach of children and unauthorized users.
- Report any unsafe products or incidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Compatibility:** Ensure that your firearm is compatible with the compensator. This product is designed for use with micro, subcompact, compact, and fullsize pistols that have a 1/2"x28 TPI threaded barrel.
- **Recoil Management:** Due to the compensator's design, recoil spring tuning may be required. Consult a qualified gunsmith if you are unsure about the necessary adjustments.
- **Installation Warning:** The builtin antirotation system may not work with pistols that use flush guide/recoil rod systems. Verify compatibility before installation.
- **Torque Specifications:** When installing the set screw, ensure it is tightened to exactly 40 in/lbs (4.5 Nm) to prevent loosening during use.
- **Loctite Application:** It is recommended to reapply Loctite® Threadlocker Blue 243® anytime the set screw is removed before reinstalling.

Instructions for Installation and Usage

1. Preparation:

- Ensure your firearm is unloaded and pointed in a safe direction.
- Gather necessary tools: Torx tool (T20) and Loctite® Threadlocker Blue 243®.

2. Installation:

- Remove the existing compensator or muzzle device from your firearm.
- Clean the threaded area of the barrel to ensure proper fitment.
- Align the compensator with the threaded barrel and screw it on handtight.
- Use the Torx tool to tighten the set screw securely to 40 in/lbs (4.5 Nm).
- If necessary, apply Loctite® Threadlocker Blue 243® to the set screw before final tightening.

3. Usage:

- After installation, perform a function check to ensure the compensator is securely attached.
- When firing, maintain a firm grip on the firearm to manage recoil effectively.
- Monitor the performance of the compensator and your firearm during use.

4. PostUse Inspection:

- After each use, inspect the compensator and firearm for any signs of wear or damage.
- If any issues are detected, cease use and consult a qualified gunsmith for assessment.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding firearm accessories.
- Do not dispose of the product in regular household waste.
- Contact your local waste management authority for guidance on safe disposal methods.

Contact Information for Further Support
