

SUPER 42 BRAIDED WIRE SPRING & H1 BUFFER - GEISSELE AUTOMATICS SUPER 42 BRAIDED WIRE BUFFER SPRING AND BUFFER COMBO, H2

[Rifle Parts](#) > [Receiver Parts](#) > [Recoil Parts](#) > [Recoil Buffers](#)

The Geissele Super 42 Spring was designed to improve the function and reliability of your AR-15 pattern rifle. Its unique spring design uses three independent strands of wire, just like the German MG42 Machine Gun. This concept acts as a harmonic damper and energy absorber by allowing the springs to flex separately from each other. This flex helps displace excess energy which decreases the chance of spring failure and assists with making your AR-15 more reliable. The included buffer is H1 weight. The Super 42 spring and Geissele buffer are designed to work together as a set; the spring will not fit over a standard buffer. If installed with a standard buffer damage to the rifle or receiver extension will occur.

Attributes

- Name: [GEISSELE AUTOMATICS SUPER 42 BRAIDED WIRE BUFFER SPRING AND BUFFER COMBO, H2](#)
- Manufacturer: [GEISSELE AUTOMATICS](#)
- Product no.: 430105577

Safety Instruction Guide for SUPER 42 BRAIDED WIRE SPRING & H1 BUFFER

Introduction

Thank you for choosing the SUPER 42 BRAIDED WIRE SPRING & H1 BUFFER by Geissele Automatics. This product is designed to enhance the reliability and performance of your AR15 pattern rifle. Please read this safety instruction guide carefully to ensure safe usage and installation.

General Safety Guidelines

- Ensure that you read and understand all instructions before using the product.
- Always handle firearms and related components with care and attention.
- Store the product in a safe place, out of reach of children and unauthorized users.
- Regularly inspect the product for any signs of wear or damage.
- Report any unsafe products or incidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- The SUPER 42 Spring is designed specifically for AR15 pattern rifles. Do not use it with other firearms.
- The spring and buffer are designed to work together as a set. Do not attempt to use the spring with a standard buffer.
- Using the spring with a standard buffer may cause damage to your rifle or receiver extension.
- If you notice any unusual sounds or performance issues during use, discontinue use immediately and consult a qualified gunsmith.
- Always ensure that your firearm is unloaded before installing or replacing any components.

Instructions for Installation and Usage

1. Preparation

- Ensure that the firearm is unloaded and pointed in a safe direction.
- Gather the necessary tools for installation, including a buffer tube wrench and a torque wrench.

2. Installation Steps

- Remove the existing buffer and spring from the buffer tube.
- Inspect the buffer tube for any signs of wear or damage.
- Insert the SUPER 42 BRAIDED WIRE SPRING into the buffer tube.
- Attach the H1 BUFFER to the end of the spring.
- Ensure that the buffer is securely seated within the buffer tube.
- Reassemble your rifle according to the manufacturer's instructions.

3. PostInstallation Checks

- Conduct a function check to ensure that the rifle operates correctly.
- Confirm that the spring and buffer are functioning as intended without any binding or unusual resistance.

Disposal Instructions

- When disposing of the product, follow local regulations regarding the disposal of firearm components.
- Do not dispose of the product in regular household waste.
- If in doubt, contact your local waste management authority for guidance.

Contact Information for Further Support

For any questions or concerns regarding the SUPER 42 BRAIDED WIRE SPRING & H1 BUFFER, please refer to the manufacturer's website or contact their customer service for assistance.

By following these guidelines, you can ensure a safe and effective experience with your SUPER 42 BRAIDED WIRE SPRING & H1 BUFFER. Thank you for your attention to safety.
