Recontoured into a patented (United States Patent Number: D901616) semi-clubfoot design, the Mod 2 is fits on Mil-Spec carbine receiver extensions, and optimized for intermediate length receiver extensions (MK2, AR10, A5). These improved lines also enhance shooting in the prone position while remaining snag free, with no edges to catch or tangle in slings, antenna, or other PPE. A SCION OF CONFLICT DELIVERING UNSURPASSED PERFORMANCE Retaining the patented* internal latch system and the ambidextrous rotation limited QD interface, the BCM Mod 2 Stock features an end user removable buttpad, an improved VBOST (Vehicle Borne Operations Sling Tab) sling retention point, "plus two additional web sling attachments slots. United States Patent Number: 9,109,855 ADAPT TO YOUR MISSION MODULAR BUTTPAD Selecting between a rubberized pad, traditional in light infantry operations; or solid diamond textured non-slip surface, optimized for high-ready weapons manipulation, the removable Modular Buttpad is capable of enabling both techniques. VBOST The VBOST is an interface that provides multiple positions for retention bands when the weapon system is run with the sling "S-folded" against the stock. Typically configured in this manner for vehicle operations or concealed "low vis" movement, the VBOST creates options for the end user that can be vital in critical life saving situations. MADE IN AMERICA All BCM components and accessories unite state of the art manufacturing with lightweight and durable materials to ensure components that last a lifetime, performing far beyond standards established nearly six decades ago. Like all BCM rifles and accessories, the BCM Mod 2 Stock is designed and made in the USA. Offered in two configurations: Stock only or stock kit with Mk2 RMS hardware.
