

## 5.56 ARMORER'S HEADSPACE GAUGE KIT - FORSTER 5.56 ARMORERS HEADSPACE GAUGE KIT

[Gunsmith Tools](#) > [Measuring Tools](#) > [Headspace Gauges](#)

From Forster, and Exclusive to Brownells, we have the 5.56 Armorers Headspace Gauge Kit! This kit contains one 1.4646" 5.56 Go Gauge, one 1.4868" midrange gauge, and one 1.4736" max field gauge! These gauges are manufactured by Forster with a reduced rim and cut out for the ejector. This allows the use of the gauge without the disassembly of the bolt.

# Safety Instruction Guide for 5.56 ARMORER'S HEADSPACE GAUGE KIT

## Introduction

Thank you for choosing the 5.56 Armorer's Headspace Gauge Kit from Forster. This kit is designed to help ensure the proper headspace of your firearm, promoting safe and effective use. Please read this safety instruction guide carefully to understand how to use the product safely and effectively.

## General Safety Guidelines

- Always handle all firearms and related tools with care and respect.
- Ensure that you are in a safe and secure environment when using the headspace gauges.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the gauges for any signs of wear or damage before use.
- Report any unsafe products or incidents to the appropriate authorities.

## Specific Safety Precautions for Use

- Use the gauges only for their intended purpose, which is to check the headspace of 5.56 x 45 firearms.
- Do not use the gauges if they are damaged or worn.
- Ensure that the firearm is unloaded before using the gauges.
- Follow the manufacturer's instructions carefully when using the gauges to avoid accidents.
- Avoid using excessive force when inserting or removing the gauges.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that the firearm is completely unloaded and in a safe condition.
- Gather the necessary tools and the headspace gauge kit.

### 2. Using the Gauges:

- Identify the appropriate gauge for your measurement:
  - Use the 1.4646" Go Gauge to check the minimum headspace.
  - Use the 1.4868" Midrange Gauge for a standard measurement.
  - Use the 1.4736" Max Field Gauge to check the maximum headspace.
- Insert the selected gauge into the chamber of the firearm.
- Close the bolt and ensure that it locks securely.
- If the bolt does not close on the Go Gauge, the headspace is too short.
- If the bolt closes on the Max Field Gauge, the headspace is too long.
- Repeat the process as necessary with the other gauges for comprehensive measurement.

### 3. PostUse:

- Remove the gauge from the chamber carefully after measurements.
- Clean and store the gauges in a safe place to prevent damage.

## Disposal Instructions

- Dispose of any damaged or unusable gauges in accordance with local regulations.
- Do not dispose of gauges in regular household waste. Instead, take them to a designated recycling or

hazardous waste facility.

## **Contact Information for Further Support**
