The Breek Arms WARHAMMER MICRO MOD2 ambi charging handle is a simple and affordable upgrade that will substantially increase the use of your AR-15. Easily grab on either side of the handle and you can quickly charge your rifle even with large gloves with the textured grooves that are cut into the latch handles. The smaller latches on the MICRO are for use when shooting with gear, slings, or barriers to avoid snagging. The total width of the latches measures 2.40", slightly wider than a standard charging handle width. The low profile design keeps it slim and sleek looking without sacrificing functionality. Made entirely out of 7075 aluminum for added strength and durability! The new MOD2 design features improvements for further reducing gas blowback in the shooter's face. The relief cuts on the top and bottom of the stem are designed to help direct extra gas out the side and away from your face. And for any gas that does manage to go straight back, we increased the height of the shelf to better cover the back of the upper. These modifications help improve the shooting experience, especially when shooting suppressed! FEATURES: Material: 7075-T6 aluminum Fits all mil spec AR15/M16 Rifles Finish: Type III hard-coat anodized Perfect replacement for any factory charging handle Latches are also 7075-T6 aluminum Reduced size ambidextrous release levers on both sides, 2.40" total width across the handles Set-Back Latches work great for large optics Allows for one handed manipulation Higher Rear Shelf and Relief Cuts to Divert Suppressor Gasses Weighs in just under 1 ounce! No gun smith required Made in America
