

MCH-EDC EVERYDAY CARRY DUAL-FUEL FLASHLIGHT - CLOUD DEFENSIVE MCH-EDC 2.0 DUAL-FUEL EVERYDAY CARRY FLASHLIGHT 1700 LUM BLK

[Emergency & Survival Gear](#) > [Lighting](#) > [Flashlights](#)

The MCH line of handhelds redefined what a EDC-style light could do. Wildly popular, it was instant success. And thankfully, customers spoke and gave Cloud Defensive immediate feedback. As always, Cloud listened. And now, Cloud Defensive have integrated your requests and have brand-new capabilities in the latest iteration of the MCH series. With these changes, the MCH surges that much further in front of the rest. Programmability: The MCH is now fully programmable, by the end-user. This allows you, for the first time, full control over the output of the flashlight. Every MuCh ships from the factory in Mode 1. But there are 4 other modes you can select, based on your needs. And you can change the programming anytime you want. So the MCH is more configurable than ever before. Mode 1: High-only (100%) Mode 2: Low (10%), High (100%) Mode 3: High (100%), Low (10%) Mode 4: Very Low (5%), Medium (30%), High (100%) Mode 5: High (100%), Medium (30%), Very Low (5%) Light Heads With the advent of the Programmable light heads, the MCH line has now been streamlined for you. The EDC line, which is a higher lumen and lower candela offering. And the HC line, which is a slightly lower lumen and higher candela offering. Both of which are again, fully programmable. Tail Cap Configurations: Critically, MCH allows the user to carefully select from an industry-first (and Patented) Adjustable Negligent Discharge protection system. Each light ships with the full ND Protection package and the user can now configure the tail cap for their respective needs. Be it deep-pocket carry or being at home on your plate carrier, the MCH is duty-grade in every way. And fully configurable to what you need. If your need changes, you just adjust the ND Protection accordingly with parts you already have. Fully Customizable: You can now optimize the tail cap of your handheld light. Cloud Defensive are proud to offer an industry-first Negligent Discharge Protection system for the MCH that end users can adjust as needed. The shorter ND protector reduces the amount of shrouding around the switch and is ideal for anyone planning to use the Thyrm SwitchBack Technique. You are also able to easily utilize many of the other traditional low-light defensive techniques with this option. The other 2 ND protectors offer progressively more robust ND protection as they create a hard barrier between the outside world and the light switch. This is optimal for concealed carry and EDC in instances where the light may be in your pocket and you need to avoid inadvertently turning that light on while seated, etc. The best part? The entire ND Protection System comes with EVERY MCH. And these are easily interchanged by you, the end user. If you need to adjust the light from one role to the other, it can be done in about 10 seconds. Power: The Full size MCH uses 1 Lithium Ion, Rechargeable, Flat-top, Unprotected 18650 or 18350, depending on model, which is included. It is also compatible with most button-top unprotected cells and. The Full size MCH has very limited compatibility with Protected cells. Do not assume compatibility with those. Cloud Defensive favor the Unprotected cells due to the substantial performance increases. The MCH lights also now accept CR123 batteries. Use of CR123 batteries will absolutely result in lower output and shorter run-times. That is purely a function of CR123 cells being very inferior to Cloud Defensive's rechargeable cells. But this new CR123 capability is perfect for use in emergency situations. Pocket Clip: The MCH ships with a standard, metal deep-carry pocket clip that is made from spring

steel and then heat-treated and black nitride plated. Materials and Durability: The MCH is precision machined from Certified 6061-T6 aluminum. Has a type III Anodized to MIL STD. "Hard coat". Has an IPX-8 waterproof rating. Fully submersible to 100 Ft. for 24 hours. Warranty: Similar to all Cloud Defensive products, the MCH is covered under Cloud Defensive's Transferable, Lifetime warranty. 30-Day Money Back Guarantee: The MCH is included in Cloud Defensive's 30-Day Money Back Guarantee. Specifications: This is a small light. By far the smallest Cloud Defensive have ever produced. Head Diameter: 1.20" Full Size MCH Length: 5.175" Full Size MCH Weight (with battery): 5.71 oz The MCH lights also now accept CR123 batteries. Two CR123A Output: 30,000 Candela/550 Lumens/60 minutes. AVAILABLE IN THE FOLLOWING BATTERY CONFIGURATIONS: 18650 Single Output option: 40,000 Candela/1700 Lumens/65 minutes 18350 Single Output option: 35,000 Candela/1200 Lumens/35 minutes. Included In Box Mission Configurable Handheld UI2 Charger 1 Battery 3 ND Protectors Proprietary Low-Profile Deep-Carry Pocket Clip

Attributes

MCHEDC Everyday Carry DualFuel Flashlight

Safety Instructions

Introduction

Thank you for choosing the MCHEDC Everyday Carry DualFuel Flashlight. This guide provides essential safety instructions to ensure the safe use of your flashlight. Please read this manual carefully before using the product to maximize safety and performance.

General Safety Guidelines

- Ensure the flashlight is used as intended and according to the instructions provided in this manual.
- Always check for any visible damage before use. If the flashlight appears damaged, do not use it.
- Keep the flashlight away from children. This product is not a toy and should be used by adults or under adult supervision.
- Avoid exposing the flashlight to extreme temperatures, moisture, or hazardous environments.
- Use only recommended batteries (18650 or 18350 Lithium Ion) and avoid mixing different types of batteries.
- Do not attempt to modify or disassemble the flashlight. Any unauthorized alterations may compromise safety and void the warranty.
- In case of malfunction or unusual behavior, discontinue use immediately and contact support for assistance.

Specific Safety Precautions for Use

- **Battery Safety:**

- Use only unprotected Lithium Ion batteries in the flashlight.
- Do not use damaged or leaking batteries.
- Ensure batteries are installed correctly, observing polarity (+/-) markings.

- **Light Output:**

- Be aware that the flashlight can produce high levels of brightness. Avoid shining the light directly into the eyes of yourself or others.
- Use caution when using the flashlight in dark environments to avoid tripping or falling.

- **Programmability:**

- Familiarize yourself with the programming modes before use.
- Adjust the modes according to your needs, ensuring you understand how to switch between them safely.

- **Negligent Discharge Protection:**

- Ensure the tail cap is properly configured for your carrying method to prevent accidental activation.
- If using the ND Protection system, confirm that it is securely in place.

- **Water Resistance:**

- The flashlight has an IPX8 waterproof rating. However, avoid prolonged submersion and ensure all seals are intact.

Instructions for Installation and Usage

- **Installing Batteries:**

1. Unscrew the tail cap of the flashlight.
2. Insert the battery (18650 or 18350) with the positive (+) end facing the head of the flashlight.
3. Replace and securely tighten the tail cap.

- **Using the Flashlight:**

1. To turn on, press the switch located on the tail cap.
2. Cycle through the modes by pressing the switch again:
 - Mode 1: Highonly (100%)
 - Mode 2: Low (10%), High (100%)
 - Mode 3: High (100%), Low (10%)
 - Mode 4: Very Low (5%), Medium (30%), High (100%)
 - Mode 5: High (100%), Medium (30%), Very Low (5%)
3. To turn off, press the switch until the light goes out.

- **Charging:**

- If using a rechargeable battery, connect the provided UI2 charger to a power source and insert the battery for charging.
- Follow the charger instructions for safe operation.

- **Using the Pocket Clip:**

- Attach the metal deepcarry pocket clip to your preferred location on the flashlight for convenient carrying.
- Ensure the clip is securely attached and does not impede the flashlight's operation.

Disposal Instructions

- Dispose of batteries and the flashlight in accordance with local regulations.
- Do not dispose of batteries in fire or water.
- Consider recycling options for batteries and electronic components to minimize environmental impact.

Contact Information for Further Support

For any inquiries regarding safety, usage, or warranty information, please refer to the manufacturer's website or contact customer support directly.

By following these safety instructions, you can ensure the safe and effective use of your MCHEDC Everyday Carry DualFuel Flashlight. Thank you for your attention to safety, and enjoy your new flashlight!
