

# CHICRO ADMIN FLASHLIGHT - CLOUD DEFENSIVE CHICRO ADMIN MICRO FLASHLIGHT 350 LUMEN BLACK

[Emergency & Survival Gear](#) > [Lighting](#) > [Flashlights](#)

The most powerful Micro handheld light. Ever. The Chicro admin light is lighthearted in name but serious in performance. When you purchase a Chicro, you get the light, battery, and charging cord. Everything you need in a small box. With 350 Lumens of light, it will light up a dark room. And with a low-power setting as well, you can dial that back to 35 Lumens of light for all the up-close tasks where you do not want overpowering light. Running on a 10440 rechargeable battery, Cloud Defensive are able to ask more of the light than ever before. And Cloud Defensive integrated a USB-C recharging port directly into the light head. No need to remove your battery. You can charge it basically anywhere now. Why Outsource? Because Cloud Defensive designs great lights but Cloud Defensive focus their American manufacturing and assembly bandwidth on the lights that you bet your life on. Things like weapon mounted lights and duty lights are all made right here in the USA in their facility. However, a much needed and very small admin light does not meet that same life saving threshold. So, Cloud Defensive designed the light, created all the specs, and sent it offshore to a trusted manufacturing partner. Outsourcing frees up internally to make the lights you bet your life on. It allows you to get high quality admin tools cost-effectively. It opens up their product catalog and it gives you options in the market. The concept checked all the right boxes. And just like that, the Chinese Micro admin light was born. Why Chicro? And in true Cloud-fashion, they wanted to be as transparent as possible about the origin of this flashlight. Nothing is more transparent than naming the Chinese Micro admin light, the Chicro. It's also hilarious and they'll be poking fun at themselves along the way as you may have guessed. It's worth noting the price is right with the Chicro. By leveraging that off-shore manufacturing, Cloud Defensive able to bring this admin light to you at an absurdly good price. And that's a great thing because you'll want them in your pocket, on your nightstand, in your desk, in your cars, in your kitchen, in your toolboxes, basically everywhere. And at this price point you can make that happen without breaking the bank. Chicro is the perfect admin tool at a great price. Output & Specs: Length: 3.640" Bezel Diameter: .625" Weight (with battery): 1.05oz Output: 350 Lumens (High), 35 lumens (Low): 40% more lumen output than the closest competitor. Run-Time: 45 minutes (High) and 6+ hours (Low) Momentary and constant-on function. A reversible pocket clip for a variety of carry and user options. Fully rechargeable 10440 battery via an integrated USB-C port.

# CHICRO ADMIN FLASHLIGHT SAFETY INSTRUCTIONS

## Introduction

Thank you for purchasing the CHICRO ADMIN FLASHLIGHT from Cloud Defensive. This powerful micro handheld light is designed for convenience and performance. To ensure safe usage and longevity of the product, please read and follow the safety instructions in this guide.

## General Safety Guidelines

- Always use the flashlight as intended and according to the instructions provided.
- Keep the flashlight out of reach of children and vulnerable individuals to prevent accidents.
- Do not expose the flashlight to extreme temperatures, moisture, or direct sunlight for prolonged periods.
- Inspect the flashlight regularly for any signs of damage. Do not use if damaged.
- Avoid looking directly into the light beam to prevent eye injury.
- Use only the recommended battery (10440 rechargeable) and charging method (USBC) to avoid hazards.

## Specific Safety Precautions for Use

- **Battery Safety:**
  - Only use the provided rechargeable battery. Using a different battery may cause overheating or explosion.
  - Ensure the battery is installed correctly, following the polarity indications.
  - Do not attempt to charge a damaged or leaking battery.
- **Charging:**
  - Charge the flashlight in a dry, wellventilated area.
  - Do not charge the flashlight overnight or unattended.
  - Disconnect the charger once the battery is fully charged to prevent overcharging.
- **Usage:**
  - Do not use the flashlight while it is charging.
  - Avoid using the flashlight in flammable or explosive environments.
  - Use the lowpower setting (35 Lumens) for close tasks to minimize glare and enhance visibility.

## Instructions for Installation and Usage

### 1. Inserting the Battery:

- Unscrew the tail cap of the flashlight.
- Insert the rechargeable 10440 battery, ensuring correct polarity (positive and negative ends).
- Screw the tail cap back onto the flashlight securely.

### 2. Charging the Flashlight:

- Connect the USBC charging cord to the flashlight's charging port.
- Plug the other end into a USB power source.
- A red indicator light will show that charging is in progress. When fully charged, the light will turn off.

### 3. Operating the Flashlight:

- To turn on the flashlight, press the button located on the body.
- Press the button again to switch between high (350 Lumens) and low (35 Lumens) settings.

- For momentary activation, press and hold the button. Release to turn off.

#### **4. Using the Pocket Clip:**

- The flashlight features a reversible pocket clip for convenient carrying.
- Adjust the clip based on your preferred carry style (tipup or tipdown).

## **Disposal Instructions**

- Dispose of the flashlight and battery in accordance with local regulations.
- Do not dispose of the battery in household waste. Instead, take it to a designated recycling center.
- For the flashlight, check for local ewaste disposal options to ensure safe and responsible disposal.

## **Contact Information for Further Support**
