

TWO STAGE TRIGGER UNIT FOR RUGER 10/22 - KIDD INNOVATIVE DESIGN TWO STAGE TRIGGER UNIT FOR 10/22 BLACK BLK CURVED EXTENDED

[Rifle Parts](#) > [Triggers Parts](#) > [Triggers](#)

The KIDD is the best aftermarket 10/22 trigger on the market. Whether you are shoot Smallbore Silhouette, the Sportsman's Team Challenge or just hate Crows and Groundhogs this is the trigger you have been looking for. What makes it the best you ask? Tony Kidd's patented two stage design. It offers the incredibly clean and consistent let off expected in a target trigger while maintaining the total reliability and safety required of a field trigger. The pull weight can be infinitely distributed between the two stages offering a pull as light as 6 ounces (3 ounces on the first stage and 3 ounces on the second stage) or as heavy as 2.5 pounds. The KIDD trigger guard is CNC machined from 6061 T6 billet aluminum and each assembly. The hammer, sear, transfer bar and other internal tool steel parts are CNC machined and cut by a wire EDM. All springs are manufactured by a .22 aficionado and KIDD customer Murphy & Read Springs. We assemble each trigger in the KIDD shop employing the strictest quality control knowing our reputation rides on every trigger. What the is a two-stage trigger? The two-stage trigger offers a unique geometry which allows a very clean, light, and repeatable break. This is accomplished by distributing the trigger pull weight into two distinct segments. The first segment or stage is an initial take up which leads to the second stage. As you pull the trigger rearward taking up the first stage weight, you will feel a stop. This is the second stage. At this point the hammer and sear are engaged by .001" and any further rearward movement of the trigger will release the hammer firing the shot. The advantage to this system, which is used on all European competition autoloaders, is the ability to not only have very consistent trigger breaks but to also allow light and reliable trigger breaks. In an autoloading rifle this can only be accomplished with a two-stage trigger. When cocked, the two stage has approximately .040" hammer and sear engagement, almost 10 times that of the factory trigger. Only KIDD offers a 10/22 trigger assembly which incorporates precise let off, complete reliability and total safety. FEATURES: Best drop-in aftermarket trigger for the 10/22 No finer trigger can be had for this rifle Faster Lock Time results in less interference of the shot

Attributes

- Name: [KIDD INNOVATIVE DESIGN TWO STAGE TRIGGER UNIT FOR 10/22 BLACK BLK CURVED EXTENDED](#)
- Manufacturer: [KIDD INNOVATIVE DESIGN](#)
- Product no.: 430109360

TWO STAGE TRIGGER UNIT FOR RUGER 10/22

SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the TWO STAGE TRIGGER UNIT FOR RUGER 10/22 from KIDD INNOVATIVE DESIGN. This product is designed to enhance the performance of your firearm while prioritizing safety. Please read this safety instruction guide carefully to ensure safe usage and compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always treat the firearm as if it is loaded.
- Keep the firearm pointed in a safe direction at all times.
- Ensure that the trigger is not pulled until you are ready to shoot.
- Store the firearm and trigger unit in a secure location, out of reach of children and unauthorized users.
- Regularly inspect the trigger unit and firearm for any signs of wear or damage.
- Use only compatible parts and accessories with your trigger unit.
- Follow all local laws and regulations regarding firearm usage and modifications.

Specific Safety Precautions for Use

- Ensure that the firearm is unloaded before installing or adjusting the trigger unit.
- Do not attempt to modify the trigger unit or firearm beyond the manufacturer's specifications.
- Only use the trigger unit in firearms it is designed for (Ruger 10/22).
- Be aware of the increased sensitivity of the twostage trigger design; practice safe handling at all times.
- If you experience any malfunction or irregular behavior, cease use immediately and consult a qualified gunsmith.

Instructions for Installation and Usage

Installation

1. **Preparation:** Ensure the firearm is unloaded and pointed in a safe direction.
2. **Remove the Existing Trigger:**
 - Follow the manufacturer's instructions for disassembling the Ruger 10/22.
 - Carefully remove the existing trigger assembly.
3. **Install the KIDD Trigger Unit:**
 - Align the KIDD trigger unit with the firearm's receiver.
 - Secure the trigger unit according to the manufacturer's specifications.
4. **Check Functionality:**
 - Before using the firearm, ensure that the trigger functions correctly.
 - Test the twostage pull in a safe environment.

Usage

- When ready to shoot, place your finger on the trigger only when aiming at your target.
- Maintain a firm grip on the firearm and be aware of your surroundings.
- If the trigger feels unresponsive or not functioning as expected, stop using the firearm immediately.

Disposal Instructions

- Dispose of the trigger unit and any associated components in accordance with local regulations.

- Do not dispose of the trigger unit in regular household waste.
- Consider recycling options for metal components where available.

Contact Information for Further Support

For any questions regarding the TWO STAGE TRIGGER UNIT FOR RUGER 10/22 or safety concerns, please refer to the manufacturer's contact information provided with the product packaging.

Thank you for prioritizing safety and compliance while using your TWO STAGE TRIGGER UNIT FOR RUGER 10/22. Enjoy your enhanced shooting experience!
