

JPSCS2/VMOS REPLACEMENT O-RINGS WITH SPACER SHIM - J P ENTERPRISES JPSCS2/VMOS REPLACEMENT O-RINGS W/SPACER SHIM 12PK

[Rifle Parts](#) > [Bolt Parts](#) > [Gas Rings](#)

These O-rings will replace any worn, deformed or lost rings from any JP Silent Captured Spring or Variable Mass Operating System (VMOS™) bolt carrier. Replacement of O-rings should take place when you start to see fraying or cracking of the rings. This will happen sooner in the case of 9mm carbines, around 5000 rounds.

JPSCS2/VMOS Replacement ORings with Spacer Shim Safety Instruction Guide

Introduction

Thank you for choosing the JPSCS2/VMOS Replacement ORings with Spacer Shim by J P Enterprises. This guide provides essential safety instructions to ensure the safe use and maintenance of your product. Please read through this document carefully to understand how to use the replacement Orings safely and effectively.

General Safety Guidelines

- Ensure that the Orings are compatible with your JP Silent Captured Spring or Variable Mass Operating System (VMOS™) bolt carrier before installation.
- Always inspect the Orings for any signs of wear, such as fraying or cracking, before each use.
- Store the Orings in a cool, dry place away from direct sunlight to prevent degradation.
- Keep the product out of reach of children and vulnerable individuals to avoid accidental ingestion or misuse.
- In case of any accidents or product malfunctions, report them to the appropriate authorities.

Specific Safety Precautions for Use

- Only use the Orings with the specified JP products to avoid compatibility issues.
- Do not attempt to modify or alter the Orings or any associated components.
- If you notice any irregularities during operation, such as unusual sounds or performance issues, cease use immediately and inspect the product.
- Avoid using the product in extreme conditions that may affect its performance, such as high temperatures or exposure to harsh chemicals.

Instructions for Installation and Usage

1. Preparation:

- Gather necessary tools for installation, including a clean workspace.
- Ensure that your bolt carrier is clean and free from debris.

2. Removing Old ORings:

- Carefully remove any worn or damaged Orings from the bolt carrier.
- Inspect the area for any remaining debris or damage.

3. Installing New ORings:

- Take the new JPSCS2/VMOS Replacement ORings and ensure they are free from defects.
- Place the new Orings onto the designated grooves of the bolt carrier, ensuring a snug fit.
- If applicable, install the spacer shim as per the manufacturer's guidelines.

4. Final Checks:

- Once installed, doublecheck that the Orings are seated properly and that there are no gaps.
- Perform a function check to ensure the bolt carrier operates smoothly.

5. Usage:

- Use your firearm in accordance with the manufacturer's instructions, ensuring that the Orings are

- functioning correctly.
- Regularly check the Orings for signs of wear during routine maintenance.

Disposal Instructions

- Dispose of any old or damaged Orings in accordance with local regulations regarding plastic waste.
- Do not dispose of Orings in household waste if they are contaminated with hazardous substances.

Contact Information for Further Support

For any inquiries regarding the JPSCS2/VMOS Replacement ORings with Spacer Shim, please refer to the manufacturer's website or contact your local distributor for assistance.

By following these instructions and guidelines, you can ensure the safe and effective use of your JPSCS2/VMOS Replacement ORings with Spacer Shim. Thank you for your commitment to safety and product integrity.
