A Case Trimmer Designed to Balance Speed and Accuracy

Lyman's Case Trim Xpress gives rifle reloaders the speed and accuracy that they have been looking for when trimming cases! The unit has its own power source, and a strong variable speed motor, so there is no need to use power drills or purchase separate motors. By using bushings that contact on the shoulder of bottle neck type cases, the Case Trim Xpress will quickly and cleanly trim your brass by simply pushing the case against the long lasting carbide cutter. The trimmer comes with a set of 10 bushings (in orange type below) designed to fit most popular bottleneck rifle cases. The bushings support and center the case with the cutter. No pilots are needed! The bushings are spring loaded to provide a smooth, effortless cut; and allow the user to trim approximately 15 cases per minute. In addition, the Case Trim Xpress is equipped with an adjustment wheel, which allows case lengths to easily be "dialed in" to .001" increments. Plus the Case Trim Xpress is made with a compact, low profile housing that doesn't eat up all of your bench space.

FEATURES

- Fast and accurate trims - approximately 15 cases per minute
- Variable speed motor and ultra-sharp, long lasting carbide cutter
- Utilizes case shoulders to center & trim (Not for use on straight wall cases)
- Comes with 10 bushings fitting most popular bottleneck rifle cartridges
- Smooth spring-loaded operation gives clean, chatter-free trims
- Compact, low profile design uses minimal bench space
- No pilots needed

Safety Instruction Guide for Lyman Brass Smith Case Trim Xpress

Introduction

Thank you for choosing the Lyman Brass Smith Case Trim Xpress. This product is designed to enhance your reloading experience by providing speed and accuracy when trimming your rifle cases. To ensure safe and effective use of this product, please read this safety instruction guide carefully.

General Safety Guidelines

- Always use the product in accordance with the instructions provided in this guide.
- Ensure that the work area is clean, dry, and well lit.
- Keep the product out of reach of children and unauthorized users.
- Inspect the product regularly for any signs of wear or damage. Do not use if damaged.
- Report any unsafe product conditions to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Electrical Safety:**
 - Ensure that the power source matches the product specifications (115V).
 - Do not use the product in wet or damp conditions.
 - Avoid using extension cords that may be damaged or frayed.
- **Operational Safety:**
 - Do not operate the Case Trim Xpress without the appropriate bushings installed.
 - Always keep hands and loose clothing away from moving parts during operation.
 - Do not attempt to modify the product or use it for any purpose other than intended.
- **Maintenance Safety:**
 - Disconnect the power supply before performing any maintenance or cleaning.
 - Use only recommended replacement parts and accessories.

Instructions for Installation and Usage

1. Setting Up the Case Trim Xpress:

- Place the unit on a stable and flat surface.
- Ensure that the power cord is securely connected to an appropriate power source.
- Select the appropriate bushing for the case you will be trimming and install it according to the manufacturer's instructions.

2. Using the Case Trim Xpress:

- Adjust the wheel to set the desired case length in .001" increments.
- Insert the case into the bushing, ensuring it is centered.
- Gently push the case against the carbide cutter to initiate trimming.
- Allow the motor to perform the trimming without force; the springloaded mechanism will handle the cut smoothly.
- Trim approximately 15 cases per minute, ensuring to monitor the process for safety.

3. PostUse Procedures:

- Once trimming is complete, turn off the unit and unplug it from the power source.

- Clean the unit and remove any brass shavings from the work area.
- Store the unit in a dry place, away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of the product and any associated packaging materials in accordance with local regulations.
- Do not dispose of electrical components in regular household waste; check with local authorities for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or further assistance with the Lyman Brass Smith Case Trim Xpress, please refer to the contact information provided with your product packaging or visit the manufacturer's website.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with your Lyman Brass Smith Case Trim Xpress. Thank you for your attention to safety!
