

SINCLAIR BULLET SEATING DEPTH TOOL - SINCLAIR INTERNATIONAL BULLET SEATING DEPTH GAUGE WITH STANDARD GUIDE

[Reloading](#) > [Measuring Tools](#) > [Bullet Seating Depth Tools](#)

The Sinclair Bullet Seating Depth Tool has been used for decades by handloaders seeking the most accuracy out of their rifles. Our newest model is made from one fourth inch ground and polished stainless steel with one end turned down for use with 17 and 20 caliber rifles and the other end used for 22 caliber and up. This tool helps you determine the length of a loaded round touching the rifling. The Sinclair Seating Depth Tool will work with most bolt action, single shot and AR type rifles. The tool includes a Delrin action guide suitable for most bolt-action rifles (0.690" Diameter fits Remingtons, Savages, Winchesters, and many Rugers). For the most accurate measurement, the Sinclair Bullet Seating Depth Tool uses your fireformed brass and bullets so you can expect an exact measurement, every time. Also available are guides use in AR-15's, AR-10's, and Tubb's 2000's. The guide is a little different than our standard bolt-action guides. This guide inserts into the back of the upper receiver (with the bolt removed). The tool is then used as normal. For best results couple this tool with our Bullet Comparators and a good set of calipers to get repeatable and precise Base-To-Ogive measurements.

Attributes

- Name: [SINCLAIR INTERNATIONAL BULLET SEATING DEPTH GAUGE WITH STANDARD GUIDE](#)
- Manufacturer: [SINCLAIR INTERNATIONAL](#)
- Product no.: 749004650
- Mfr. No.: 594000

Safety Instruction Guide for Sinclair Bullet Seating Depth Tool

Introduction

Thank you for choosing the Sinclair Bullet Seating Depth Tool. This tool is designed to help handloaders achieve maximum accuracy with their rifles. To ensure safe and effective use, please read this safety instruction guide carefully.

General Safety Guidelines

- Always handle the tool with care to prevent injury.
- Ensure that you are using the tool in a safe environment, free from distractions.
- Keep the tool out of reach of children and vulnerable individuals.
- Regularly inspect the tool for any signs of damage or wear before use.
- Follow all local regulations and guidelines related to firearms and ammunition.

Specific Safety Precautions for Use

- Use the tool only for its intended purpose: determining the length of a loaded round touching the rifling.
- Do not use the tool if it is damaged or if any parts are missing.
- Always ensure that the firearm is unloaded before using the tool.
- When using the tool with ARtype rifles, ensure the bolt is removed before inserting the guide.
- Use protective eyewear when handling firearms and ammunition.
- Avoid wearing loose clothing or jewelry that may get caught in the tool or firearm.

Instructions for Installation and Usage

1. Preparation

- Ensure that your workspace is clean and organized.
- Gather your fireformed brass and bullets for accurate measurement.

2. Using the Tool

- For boltaction and singleshot rifles:
 - Insert the Delrin action guide into the chamber of your rifle.
 - Ensure it fits securely and does not obstruct the chamber.
- For ARtype rifles:
 - Remove the bolt from the upper receiver.
 - Insert the guide into the back of the upper receiver.
 - Ensure it fits securely.
- Use the tool to measure the length of the loaded round touching the rifling.
- Record your measurements for future reference.

3. Best Practices

- For the most accurate measurements, always use the same brass and bullets.
- Combine the use of the Sinclair Bullet Seating Depth Tool with bullet comparators and calipers for precise BaseToOgive measurements.
- Store the tool in a safe and dry location when not in use.

Disposal Instructions

- Dispose of the tool in accordance with local regulations.
- If the tool is damaged beyond repair, do not dispose of it in regular waste; consider recycling options where available.
- Ensure that any hazardous materials are handled according to local environmental guidelines.

Contact Information for Further Support

For any safety inquiries or further support regarding the Sinclair Bullet Seating Depth Tool, please refer to the contact information provided with your product packaging or visit the manufacturer's website.

Please remember to prioritize safety while using the Sinclair Bullet Seating Depth Tool. By following these guidelines, you can ensure a safe and effective handloading experience.
