

ULTRA™ MICROMETER SEATER DIES - 223 WSSM MICROMETER SEATER DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Forster Reloading Dies are of excellent quality and provide the reloader with the ability to produce concentric rounds time and time again. Each die is manufactured from the finest quality steel carefully machined to very tight tolerances. Dies are hand polished both before and after the heat-treating process to guarantee an extra fine finish. All Forster reloading dies feature their Forster Cross Bolt Die Locking Ring that tightens the two ends of the split ring instead of tightening a screw directly into the threads of the die. The Forster Ultra Seater includes all of the features of the Forster Bench Rest Seater Die above, plus an ultra accurate micrometer adjustment. This micrometer adjustment allows you to adjust bullet seating depth from .0005 inch to .001 inch increments, and makes switching bullets easy - just dial back to your previous recorded setting. Forster Ultra Seaters make fine tuning your bullets to the lands of your rifling simple.

ULTRA™ MICROMETER SEATER DIES 223 WSSM MICROMETER SEATER DIE Safety Instruction Guide

Introduction

Thank you for choosing the ULTRA™ MICROMETER SEATER DIES 223 WSSM MICROMETER SEATER DIE by Forster Products, Inc. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read this manual carefully before using the die to understand the safety precautions and proper handling procedures.

General Safety Guidelines

- Ensure that all users are familiar with the safe handling of reloading equipment.
- Always wear appropriate personal protective equipment (PPE), such as safety glasses, when reloading ammunition.
- Keep the workspace clean and organized to prevent accidents.
- Store dies and reloading components in a secure location, out of reach of children and unauthorized persons.
- Regularly inspect the die for any signs of wear or damage before use.
- Follow all local laws and regulations regarding ammunition reloading.

Specific Safety Precautions for Use

- Do not exceed the recommended load specifications for the cartridges you are using.
- Avoid using the die with damaged or improperly sized casings.
- Ensure that the micrometer adjustment is securely locked before attempting to seat bullets.
- Never place your hands or any body parts near the die while in operation.
- Use the die only for its intended purpose—bullet seating for the 223 WSSM cartridge.
- If you experience any unusual resistance or difficulty while using the die, stop immediately and inspect for issues.

Instructions for Installation and Usage

1. Installation:

- Secure the die in a reloading press that is compatible with the 223 WSSM cartridge.
- Tighten the Forster Cross Bolt Die Locking Ring to ensure the die is held firmly in place.

2. Adjusting the Micrometer:

- To adjust the bullet seating depth, unlock the micrometer adjustment by turning it counterclockwise.
- Rotate the micrometer to achieve the desired depth in increments of .0005 inch to .001 inch.
- Once the desired setting is reached, lock the micrometer adjustment by turning it clockwise.

3. Seating Bullets:

- Insert a casing into the reloading press and ensure it is properly positioned.
- Place the bullet on top of the casing.
- Engage the press to seat the bullet into the casing. Ensure that the bullet is seated evenly.

4. PostUse Cleaning:

- After use, clean the die with a soft cloth to remove any residue.
- Store the die in a dry and secure location.

Disposal Instructions

- Dispose of any spent casings and reloading components in accordance with local regulations.
- Do not dispose of used dies in regular household waste. Instead, check with local authorities for proper disposal methods.
