

ULTRA™ MICROMETER SEATER DIES - FORSTER PRODUCTS, INC.

6MM PPC MICROMETER SEATER DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Forster Reloading Dies are of excellent quality and provide the reloader with the ability to produce concentric rounds time and time again. Each die is manufactured from the finest quality steel carefully machined to very tight tolerances. Dies are hand polished both before and after the heat-treating process to guarantee an extra fine finish. All Forster reloading dies feature their Forster Cross Bolt Die Locking Ring that tightens the two ends of the split ring instead of tightening a screw directly into the threads of the die. The Forster Ultra Seater includes all of the features of the Forster Bench Rest Seater Die above, plus an ultra accurate micrometer adjustment. This micrometer adjustment allows you to adjust bullet seating depth from .0005 inch to .001 inch increments, and makes switching bullets easy - just dial back to your previous recorded setting. Forster Ultra Seaters make fine tuning your bullets to the lands of your rifling simple.

Attributes

- Name: [FORSTER PRODUCTS, INC. 6MM PPC MICROMETER SEATER DIE](#)
- Manufacturer: [FORSTER PRODUCTS, INC.](#)

ULTRA™ MICROMETER SEATER DIES FORSTER PRODUCTS, INC. Safety Instructions Guide

Introduction

Thank you for choosing the ULTRA™ MICROMETER SEATER DIES from Forster Products, Inc. This guide provides essential safety instructions to ensure the safe use and handling of the product. Please read this guide carefully before using the dies.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose of bullet seating.
- Always wear appropriate safety gear, including eye protection, when reloading ammunition.
- Keep the dies and all reloading equipment out of reach of children and unauthorized users.
- Regularly inspect the dies for any signs of wear or damage. Do not use damaged dies.
- Follow all local laws and regulations regarding ammunition reloading.

Specific Safety Precautions for Use

- When adjusting the micrometer, do so slowly and carefully to avoid overtightening or damaging the mechanism.
- Ensure that the die is properly secured in the reloading press before use.
- Avoid using excessive force when seating bullets; this can lead to misalignment and potential hazards.
- Always check the seating depth after adjustments to ensure accuracy.
- Do not attempt to modify or repair the dies yourself. Contact the manufacturer for assistance.

Instructions for Installation and Usage

1. Installation:

- Ensure your reloading press is clean and free from debris.
- Carefully screw the ULTRA™ MICROMETER SEATER DIE into the reloading press according to the manufacturer's instructions.
- Tighten the die securely, but do not overtighten, as this may damage the threads.

2. Usage:

- Before starting, ensure that all components are compatible with the 6MM PPC cartridge.
- Adjust the micrometer to the desired bullet seating depth, using increments of .0005 inch to .001 inch.
- Insert the bullet into the die and operate the reloading press to seat the bullet.
- After seating, check the bullet depth with a caliper to ensure precision.
- Record your settings for future reference, allowing for easy adjustment when switching bullets.

Disposal Instructions

- Dispose of any defective or damaged dies in accordance with local waste management regulations.
- Do not throw away the dies in regular household waste.
- Contact local recycling centers for information on proper disposal methods for metal products.

Contact Information for Further Support

For safety inquiries, product support, or to report unsafe products, please refer to the manufacturer's contact details found on the packaging or the official website.

By following these safety instructions, you can ensure a safe and effective reloading experience with the ULTRA™ MICROMETER SEATER DIES. Always prioritize safety and compliance with local regulations. Thank you for choosing Forster Products, Inc.
