

COMPETITION PRO 3-DIE SETS - COMPETITION PRO 3-DIE SET 38-40 WCF

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

These Competition Pro Series three die sets are also designed for use in progressive reloading machines by reloaders seeking the most advanced bullet alignment available. Since carbide dies are not available for certain cartridges, the sizing die is Redding's unique 91000 series in heat-treated steel. To apply a tighter, more uniform roll type crimp, our popular Profile Crimp Die is used. No expander die is included, as most popular progressive machines expand the case mouth at the powder metering station. Includes a Sizing die, Competition Seating Die with Micrometer, and Profile Crimp Die.

Safety Instruction Guide for COMPETITION PRO 3DIE SETS

Introduction

Thank you for choosing the COMPETITION PRO 3DIE SET 3840 WCF. This product is designed to provide precision and efficiency in your reloading process. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always handle reloading equipment with care to prevent accidents.
- Ensure that your workspace is clean, organized, and free from distractions.
- Store all reloading components and equipment out of reach of children and pets.
- Use personal protective equipment (PPE) such as safety glasses and gloves when reloading.
- Be aware of the specific requirements for the 3840 Winchester cartridge and ensure compatibility with your reloading equipment.
- Regularly inspect your reloading dies and equipment for wear or damage.

Specific Safety Precautions for Use

- **Carbide Dies:** Note that carbide dies are not available for certain cartridges, and the sizing die included is Redding's unique 91000 series made from heat-treated steel. Handle with care to avoid damage.
- **Profile Crimp Die:** The Profile Crimp Die is designed for a tighter, more uniform crimp. Ensure it is properly adjusted to avoid overcrimping, which can lead to dangerous conditions.
- **Progressive Reloading Machines:** If using a progressive reloading machine, confirm that it expands the case mouth at the powder metering station, as no expander die is included in this set.
- **Micrometer Adjustments:** The Competition Seating Die features a micrometer for precise adjustments. Make adjustments slowly and carefully to avoid misalignment.

Instructions for Installation and Usage

1. Setup:

- Ensure your reloading press is securely mounted and stable.
- Gather all necessary components: Sizing die, Competition Seating Die, and Profile Crimp Die.

2. Installation:

- Install the Sizing Die into your reloading press according to the manufacturer's instructions.
- Adjust the die to ensure proper sizing of the 3840 Winchester cartridge.
- Install the Competition Seating Die and adjust the micrometer for the desired bullet seating depth.
- Finally, install the Profile Crimp Die and adjust it to achieve the required crimp.

3. Usage:

- Follow the reloading process stepbystep, ensuring each die is used in the correct sequence.
- Monitor the process closely and check for any signs of malfunction or misalignment.
- After each batch, inspect the finished cartridges for quality and safety.

Disposal Instructions

- Dispose of any damaged or wornout dies and components in accordance with local regulations.
- Do not dispose of reloading materials in regular household waste. Follow local guidelines for hazardous materials.

Contact Information for Further Support

For any safety inquiries or concerns regarding the COMPETITION PRO 3DIE SET, please refer to the manufacturer's contact information provided with your product.

By following these safety instructions, you can help ensure a safe and efficient reloading experience. Thank you for your attention to these important guidelines.
